RESOURCES

WASHINGTON, Oct. 9 (WP)

A study financed by the CIA has concluded that more than half of the world's new oil supplies will come from increased productioo at known oil fields, since discoveries of so-called "super-giant" oil reserves have dropped in the last

In addition, "It appears unlikely that many super-giant oil fields will be discovered in the future," the study said.
Three-fourths of the world's

known oil reserves are contained in giant oil fields cootaining from 500 million to 5 billion barrels of oil. Discovery of giant fields, however, peaked between the late 1930s and the early 1960s.

The largest oil find in recent years in the United States was the Prudhoe Bay fields on Alaska's North Slope, found in the late 1960s and containing about 10 bil-lion barrels of oil — more than a

fourth of U.S. proven oil reserves.

Rand Corp., which completed
the \$25,000 study, said that at current consumption rates, there is a 60-to-90-year petroleum supply remaining. If consumption contin-ues to grow at existing rates, how-ever, supplies could be depleted the oext 30 to 45 years, Rand

Since April 1977, when President Carter sent his National Energy Plan to Congress, the CIA has prepared a oumber of public and still secret oil estimates offering pessimistic - and at times controver-

sial — energy assessments. Richard Nehring, a Rand economist who directed the study, said that the best prospects for new oil discoveries are in the Mideast, (Continued on Page 2, Col. 2)

Three Dead, Strikes Widespread

Rioting Spreads Through Iran

MEXICO

By J.P. Smith

WASHINGTON, Oct. 9 (WP) -As the Arab oil embargo came to a close five years ago the CIA circu-lated secret reports that Mexico harbored an oil bonanza of 20 billion harrels — enough to reduce substantially U.S. dependence oo

Last month Mexico's president, lose Lopez Portillo, pegged his country's possible oil reserves at 200 billion barrels, an estimate on which U.S. oil experts concur. This would rank Mexico as a rival only to Saudi Arabia among the most

Yet the significance of a potential oil colossus along the southern border of the United States seems to have registered little impact on leading Carter administration policy-makers in energy and foreign

When asked at a press confer-ence last month about the impact of Mexican oil finds on the U.S. relationship with Arab oil-producing states, Zbigniew Brzezinski, the president's national secority adviser, replied equivocally:

"I don't have a clear notion of how any potential developments in the area of energy, in Mexico, will affect the world economic energy simation. I don't have an informed indement to make."

Nonetheless, the National Security Council staff, over which Mr. Brzezinski presides, is working on a presidential review memorandum outlining a possible linkage of energy, trade and immigration policies to encourage higher Mexican oil and gas production. The document (Continued on Page 2, Col. 1)

Government, Dissatisfied With Efforts

Bonn Shakes Up Anti-Terrorist Squad

By John Vinocur

BONN, Oct 9 (NYT) - The government has undertaken a major overhaul of its anti-terrorism apparatus, making a series of high-level personnel and organizational changes that look like an admission the job was being doce by the wrong men using the wrong mecha-

The changes involve replacing the director of the anti-terrorism division of the federal criminal bureau (BKA), the removal of the agency's two assistant chiefs, closer control of the agency by the Interi-or Ministry, and a decrease in the BKA's investigatory role.

Occurring about a year after the kidnapping and murder of Hanns-Martin Schleyer, the shake-up is a clear sign of the government's dis-satisfaction with the anti-terrorism campaign. It follows a series of alerts over the past two months and statements from officials about the growing likelihood of new terrorist action after 11 months of relative

Arrests in Interim

West German terrorists have been arrested during the interven-ing period — the number on the most-wanted list is now about 13 but most of them have been ap-prehended outside of West Germaov. At the same time, disclosures about police errors at home have increasingly created a picture of an ineffectual, often bumbling, federal law enforcement organization.

The euphoria surrounding the rescue at Mogadishu, Somalia, of West German hostages taken in connection with Mr. Schleyer's kidoapping last fall was soon replaced by deep public irritation over how BKA officials overlooked, or failed to follow up, accurate tips on where Mr. Schleyer, the head of the West German employers association, was being hidden.

Parliamentary investigations showed that incompatibilities between the computer systems used by the BKA and the 11 state police organizations slowed pursuit of terropists and that bureaucaratic complications hindered it further.

In light of the West German performance, complaints by police of-ficials here of inefficiency in other European anti-terrorist agencies took on a slightly embarrassing note, and ironic commentaries accompanied the dispatch from BKA headquarters in Wiesbaden of a group of West German police computer experts to help the Italians in their search this spring for Aldo Moro, the kidnapped former pre-

The situation come to a head in August, when BKA agents failed to act effectively on a tip that three terrorist suspects were renting a helicopter to reconnecter a prison for what was thought to be a possible jailbreak or attack. After Egyptian Reports

West Bank-Gaza Issues Downplayed by Weizman

By William E. Farrell

day downplayed reports from Egypt that the resumption of Egyptian-Israeli peace talks would also involve the far-from-resolved issue of the fate of the Israeli-occupied West Bank and Gaza Strip.

Mr. Weizman, in a briefing for reporters on his departure for the United States, said that the resumption of talks between Egypt and Israel in Washington on Thursday was meant essentially to hammer out a peace treary.

Asked about reports from Cairo

that the Egyptians were envisioning any Egyptian-Israeli peace pact as a blueprint for a settlement of the West Bank and Gaza, Mr. Weizman replied:

"Egypt is one problem. The Golan Heights is another problem. The West Bank and Gaza are definitely a different problem. I doo't think we have a common denomioator between the four disputed areas. We primarily and basically and fundamentally are going for a finalization of all the details of a peace treaty."

His remarks paralleled com-ments made by Foreign Minister Moshe Dayan last week when be departed for the United States. The

Their remarks indicated that Is-rael would seek to work out all the details on the Israeli withdrawal countries could sign a peace treaty.

perhaps in less than three months.

They also emphasized the Israeli effort to separate the settlement with Egypt from the nettlesome issue of the West Bank and the Gaza Strip. At the Camp David summit last month, two accords were signed by Egypt and Israel and wit-nessed by President Carter. The first dealt with a peace-pact framework between Egypt and Israel; the second with a framework for seek-

ing an overall Middle East peace. Recent utterances from Cairo have tended to link the two, although some Israeli officials are speculating that the Egyptian com-ments are meant more for consumption in the Arab world than at the bargaining table io Washing-ton, since the Egyptians are sensi-tive to charges that President Anwar Sadat is beet on a separate

peace with Israel. For their part, the Israelis are saying they do not intend to bring up the subject of the West Bank

and Gaza when talks begin, al-(Continued on Page 2, Col. 7)

Smith Meets Vance, Fails

NEW ISCORI W IN TO Change U.S. Position By David Binder By David

ANCIFICATE WASHINGTON, Oct. 9 (NYT)

Two hours of talks between Secretary of State Cyrus Vance and pointed by the outcome of the meeting, Mr. Smith said. "Yes, whenever I don't get my way, I am 11(11) Rhodesian Prime Minister Ian

disappointed."

Mr. Smith, bead of the white government when Rhodesia broke away from Britain in 1965, came here to plead for support of his plan for an internal settlement, incloding elections leading eventually to a black majority government. That plan has been rejected by leaders of the increasingly strong black nationalist guerrilla move-ments based along Rhodesia's borders and is also opposed by Britain and the United States.

Mr. Vance, joined by British Ambassador Peter Jay, urged Mr. Smith to consider their alternative plan, which would begin with a conference of all the parties to the Rhodesian conflict and then would move to a transitional period in which elections would be held and a constitution adopted under neu-

Outcome Is 'Status Quo'

A statement issued by the State Department after the meeting noted that both the Rhodesian guerrillas grouped in the Patriotic Front and Mr. Smith and his black allies in the present transitional government agree on the need for elections. But the statement charged that "each also seeks dominance" in the proposed transition

Mr. Smith appeared crestfallen as be entered the diplomatic lobby of the State Department after the talks, accompanied by the Rev. Ndabaningi Sithole, a black member of his four-man executive council. He said the outcome was "sta-

and interpreted more than 500 songs and he followed his meteoric career as a singer with one of movie star. The Broadway show "Jacques Brel Is Alive and Well in Paris" was devoted to his life and career. Story: Page 5.

English Is the Talk of the Town in China Language Education Drive a Part

By Fox Butterfield FO-SHAN, China, Oct. 9

(NYT) — Trouping through an IIth-century ancestral temple in this southern Chinese city, a group of American tourists were surprised to find themselves accosted in English by several smil-ing young Chinese. How are you? May I ask what

perfect phrases.
It was an innocent encounter, but in China, where only two years ago there were strict official regulations against talking with foreigners, and people were frequently persecuted for having foreign contacts, such schemes

were rare.

country you come from?" each of the Chinese began in textbook-

The young Chinese in the tem-ple, it turned out, were training to be English teachers at the Kwangtung Teachers College. They had been given a onemonth assignment to practice their language skills by standing around the red-walled temple compound and mingling with the tourists China has been allowing into the country since early this

Frequent Overtures

Other students, from another college, greeted the tourist group in the nearby Fo-shan pottery factory. Recent visitors to Chinn report such incidents throughout the country, in parks, schools, on buses, and in the streets, as millions of Chinese have begun what

Of Effort to Speed Modernization seems to be a crash course in

English, The drive to learn English is

part of China's ambitious effort to modernize itself by the turn of the century and overcome a dec-ade in which its ecucation, science, and technology were retarded by the chaos of the Cultural Revolution, China now desperately needs as many scienrists economists, and engineers as it can produce who are familiar with Western technology and

At the same time, the oew encounters between Chinese and foreigners also reflect the greater openness that Peking's leaders are now permitting. Diplomats in Peking say that the authorities have instructed the capital's residents out to try to confiscate film from foreigners taking pictures that they think might be in forbidden areas, and to answer tourists' questions frankly. The new program to learn for-

cign languages has evidently struck a popular chord, for it gives some young Chinese an outlet for supressed ambitions. Until the last year, under Mao Tse-tung's reforms, most students were forced to resettle in the countryside after finishing junior or senior high school, and the few who were able to go to college were selected for political. rather than academic, achievements. Brains and hard study did oot occessarily produce rewards.

Opportunities Improve But oow students with a good

command of a foreign language may have a better chance of going to college, and some may be able to eventually go ahroad to study. Peking is negotiating with the United States, Britain, West Germany, Japan, and several other nations to send 10,000 students overseas in the next few years. Currently. China has only 100 students abroad.

A 23-year-old woman factory worker, Fang Mei-lin, who initi-ated a conversation with a reporter in n Canton park, said that she had just passed the entrance examination to Canton's Suo Yat-sen university. She had been working in a radio factory for six years, but she had studied at night in her factory dormitory. and now it had paid off.

As part of the new foreign-language training. China's television stations have begun offering a daily half-hour English course, with similar programs on radio.

In Peking, more than a million copies of Radio Peking's English course guide have been sold, according to a recent article in a Peking paper. More strikingly, 800,000 copies bave been snapped up in An-wai province in central China and 700,000 in Kiangsu province. Several mil-lion English teaching records also have been sold recently.

In addition, it has been acnounced that China plans to invite 100 foreign teachers annually to train Chinese foreign language teachers for science and engineering universities.

Early Training Starts

Peking also has embarked on an ambitious program to start foreign language studies at the third-grade level in the newly established schools for fast

What effect all this foreign language teaching and new —if very limited — contact with foreigners will have is difficult to estimate. It seems to have helped revive motivation among students who were becoming apathetic. But it may also expose them to ideas potentially subversive to China's Communist system.

Asked about this danger, Keng Piao, a member of the Politburo and a leading theoretician, told a delegation from the American Society of Newspaper Editors last week that he was not worried. He said that he recognized the problem, but he insisted that China's leadership was moving to improve the cooditions of life and that by the time the students returned to China, things would

Officials say that the company sold arms to both Rhodesia and South Africa until United Nations

"We are manofacturers. Our role is to give our workers work and to make the factory live." Mr. Joassart said in interview. "It's not for us to tell our government we shouldn't furnish arms to one country or another.

put an end to the trade.

Government Approval

FN is required to seek Belgian government approval for the export of its arms, and the government usually bars exports to "areas of active conflict." But neither FN nor government officials will talk in de-

tail about what arms go where.

"An arms factory is a little like a bank," Mr. Joassart said. "We don't publish oor elicots' accounts." FN's sales in 1976-77 amounted to \$327 million, with about 80 per cent of production. about 80 per cent of production military-related.

military-related.

FN and government officials agree that the factory is vital to Liege. A city of 150,000 persons with a long arms-making tradition, its factories sold 200,000 weapons a year to the United States during the period of the U.S. Civil War.

The FN factory now employs about 9,300 workers in Liege, which has seen many other businesses shut down in recent times.

A United Nations flag flies over the complex — chosen, an official said, "because so many national leaders come here, that it's easier to have one flag for all of them."

Chinese Are Welcome FN is not permitted to sell arms

to irregular armies and guerrilla movements, but is eager to expand its trade with established countries. Mr. Joassart said that "the Chinese are welcome" to come and shop.

FN's leading products now include the FAL gas-operated automatic rifle, with production at 700 to 800 a day, the light Minimi machine gun and the MAG-58 machine gun and the MAG-58 machine gun (80 a day) had being built for chine gum (80 a day) being built for the U.S. Army. The contract for 10,000 weapons for the United States is worth about \$22 million, and FN hopes that the Army soon will order 10,000 more.

will order 10,000 more.

But referring to the U.S. deal,
Mr. Joassart said, "You never make
any money from NATO countries,
because of the competition and
their price bargaining. With what
we're getting from the sales to the United States, we woo't make any fortuoe. Fortunately, there are other countries to make a living

Other FN arms products include ammunition, anti-personnel and ammuniton, anti-personnel and tear gas shells and sport rifles. FN is opening a factory in South Carolina that will employ 300 persons, has a subsidiary in Brazil and is hoping to start producing anti-tank weapons and artillery.

Civilian Products

FN also maintains foundries for civilian products, builds turbines and sells its metallurgy and engineering services. The company has However, some geologists, such as the U.S. Geological Survey, a geophysicist, Dr. Bernando Grossling, as well as some industry geologists, dispute the conclusions from the Rand study. To Lebanese Phalangists, 'World Has Sacrificed Us

By Jonathan C. Randal

darkened office, Pierre Gemayel-listened to the artillery rounds ex-ploding nearby and said, "If Syria agrees to a cease-fire, of course, we

will accept it immediately."

But although the leader of the Phalange, the largest Christian militia fighting the Syrians, was speaking several hours before the latest cease-fire was announced Saturday, he had few illusions about its durability.

A veteran of 60 broken cease-

fires since the fighting began in 1975, Sheikh Pierre, as he is known throughout Lebanon, was in a somber mood.

Vigorous at 73, his hair plastered vigorous at 15, his hair plastered down on his lean skull, Mr. Gemayel sprinkled an hourlong interview with a vision of ruin, death and the "shame" of Western civilization unwilling to save Lebanon's embattled Christians.

Less Critical of Israel

He was less critical of the Christians' latest ally — Israel — which for the first time in their two-year relationship has failed to provide military muscle to relieve the pres-Mr. Gemayei's oldest son, Amin,

contended that as many as 200,000 Christians had been forced from their homes by the fighting, espe-cially residents of East Beirut and Christian suburbs; 40,000 others were living in tents, he said.

Many refugees have found shel-ter in unheated summer homes in the mountains, but winter is

approaching
Despite Syrian gunfire and the limited size of the port facilities, the Christians were bringing in 300 tons of food, arms and ammunition every two or three days, Amin Gemayel said, "from Israel, Cyprus, the United States," In contrast with other Christian

claims of desperate medical short-ages. Amin Gemayel said that they had been well-stocked and only now were feeling the pinch.

Father Sets Tone

But it was his father's view of a disappearing Lebanon that set the tone. Dressed in an elegant black leisure suit, Pierre Gemayel lament-

ed the end of his dream of a strong, respected Christian-led Lebanon.
"Instead of unity, the country is ruined," he said. "My [mountain home] at Bikfaya, 442 years old, the oldest in town, the pride of my life, destroyed." destroyed."

"We are perishing, we are dead, this is shameful," he said. "How shameful for the civilized world to react to the Lebanese drama like this, to see the destruction of the only country in the Middle East which enjoyed real freedom, civilization and democracy.

"All the world has sacrificed us,"

after 36 hours. By the war's fifth day, Israeli troops had driven the Syrians back to the 1967 line. The Egypt might do so.
The Camp David accords call for a five-year transitional plan in which the present Israeli military administration would be replaced by a system of civil autonomy for the 1.2 million Palestinian Arabs of the West Bank and Gaza.

The agreements call for a civil authority to be devised by Egypt, Israel, Jordan and representatives of the Palestinians. So far, Jordan has shown no inclination to join the talks. And West Bank leaders, including moderates who initially were somewhat positive about the summit agreement, are now vying with one another to condemn it as a "sellout" of Palestmian interests.

So far, the first steps toward progress on the West Bank-Gaza plan have yet to be taken. U.S. officials here are working hard to build up support for the Camp David accords, but publicly, there does not seem to have been much progress.

Asked about reports that a peace pact could be signed within a few weeks, Mr. Weizman said: "I am not that optimistic it is going to be that fast, but I do hope that by the end of the calendar year, we'll have a peace treaty."

Syria Denounces Accords

UNITED NATIONS, N.Y., Oct. 9 (UPI) — Syria today rejected the Camp David accords as "null and void" under international law and blamed Israel for the new crisis in

The statement by Deputy For-eign Minister Nasser Kaddam of Syria said that the Israelis had precipitated the fighting in Lebanon by supporting "certain outlawed elements" — Lebanese Christian militiamen — who were fighting Syrian forces and "tried to exploit"

the situation to spread its domition in the Middle East. Earlier, Mr. Dayan gave an or mistic view of the chances for M dle East peace as a result to Camp David talks.

China Admits To Difficulty in **Insuring Rights**

TOKYO, Oct. 9 (AP) — China's leading party newspaper has acknowledged that although democratic rights are guaranteed by the constitution, it is not easy to put these principles into effect.

The Peking People's Daily said this in a 16,000-word series that was summarized by the official Chinese news agency. "A great deal of work and struggle is involved," it said. "A major question is seeing that our cadres at various levels which we have been levels and the control of abide by the law. Some leading cadres have no concept at all of up-holding and abiding by the socialist legal system; they place their will above the legal system of the state."

The reports said that feudal thinking still persists, many cadres think only in terms of personal gain, and the long-term solution is to improve the economy and lay a foundation for citizens' legal rights.

It added that widespread propaganda and education work must be undertaken to inform the citizens of rights which have been in abeyance for more than a decade and to punish those who oppose and undermine the legal system.

The articles reflect the oew mood

of openness in Chinese society. But they also make clear that after years of repression and and changing political power, the Chinese re-main wary of the freedoms oow being dangled before them.

dinal said

'Grand Electors'

Given the rules of the game, an important role is played by a relatively small group of "grand electors," those cardinals with wide circles of contacts, gained through their work at international synods of bishops or in national conferences of bishops. The grand electors are thus able to supply facts and opinions about possible candidates.

One such is Cardinal Giovanni Benelli, now the archbishop of Florence but formerly Pope Paul VI's right-hand man for many years. As such, he got to know the strengths and weaknesses of members of the Italian hierarchy and at the same time win the confidence of many non-Italian cardinals.

According to several accounts of the last conclave, it was Cardinal Benelli who suggested to a number of cardinals that they examine the merits of Cardinal Albino Luciani,

the patriarch of Venice. At the same time, Cardinal Benelli is believed by many Vatican observers to have turned attention away from a small number of candidates from the Caria, the church's central government.

But any such counseling by Cardinal Benelli and others was strictly

day limit debate on the \$29.7-bil-bon tax-cut bill to those considered germane. A final vote on the bill is now expected this week.

Warning From Byrd

Senate Majority Leader Robert Byrd of West Virginia has said failure to pass either a tax cut bill or the energy package would delay fi-nal adjournment and might force a lame-duck session after the November elections. Both houses hope to adjourn for the year on Saturday.

After the Senate passes a tax-cut bill, it must still be reconciled with Soviet government newspaper Izvestia says the FBI fabricated the
evidence it is using in the trial of

Because of the cloture vote on tax-cut bill, bills expected to die in this session include the president's hospital-cost containment program, the Humpbrey-Hawkins "full employment" bill, labor law revision, an ethics bill and the Alaska

Corporate Tax Defeated

It said tape recordings and vi-deotape films of transactions "are WASHINGTON, Oct. 9 (Reuters) — The Senate has defeated a plan to require U.S. firms to pay U.S. taxes on their current foreign income, instead of permitting them to defer taxes until the income is returned to the United Lt. Cmdr. Arthur Lindberg, was a paid informant and wanted to ad-vance his career, implying he would

The proposal would have required U.S. multinational firms to pay taxes oo 50 per cent of current foreign income starting next year, rising to 100 percent by 1984.

The proposal, long songht by tax reformers who claim that foreign-based U.S. firms get an advantage over U.S.-based companies, was sponsored by Sen. Frank Church, D-ldabo, as an amendment to the pending tax-cut bill.

Across Atlantic Under Sails

an international crew of 14 have sailed into this port in northern Spain after a five-month crossing of the Atlantie. The crossing, which began May 7 oo Tampico, ended more than a month behind

Commanded by Vital Alsar, a 45-year-old Spaniard of Santander the three ships made the 9,000-mile trip from Mexico under sails. But they had to be hauled into Santander port by tugs on Saturday because a wind change threatened to crash them against the Spanish coast, officials said. Most of the crew members were Mexicans, but they included

Tom McCormick, a U.S. engineer who had accompanied Mr. Alsar on a previous expeditions on a raft in the Pacific. Mr. Alsar and his men built their three ships, the Cantabria, the Ana de Ayala and

the Quitus Amazonas, in the Amazon forests.

Mr. Alsar's objective was to pay tribute to Spanish explorers, particularly Francisco de Orellana—the discoverer of the Amazon and a lieutenant of Pizarro in the Conquest of Peru. During a 1538 expedition of the interior of South America, De Orellana and his party were separated from Pizarro and floated down the Amazon River mouth. De Orellana died in an attempt in 1546 to explore the river from its mouth.

U.S. Uranium Mine Nears Completion

By Sandra Blakeslee

MOUNT TAYLOR, N.M., Oct. 9 - The nation's largest and deepest uranium mine is nearing compietion here on the slopes of a Na-vajn Indian sacred mountain on a plateau of the U.S. Southwest.

Using powerful equipment, a few dozen miners have sunk two shafts to a depth of more than 3,000 feet where a rich deposit of uranium ore

The first ore will be reached within a few months but the mine will oot be in full operation until the early 1980s, according to officials of the Gulf Minerals Resources Co. of Denver. The company, which is exploiting uranium, coal and shale deposits in the West, is a subsidiary of the Gulf Oil Co.

Mount Taylor is one of four mountains held sacred by the Navajo Indian tribe. It also possesses one of the largest known uranium reserves in North America, estimated at 100 million pounds of ore.

Indian Rights

In coming years, company offi-cials will have to deal with the problems of Indian rights, because they are leasing Indian lands. The company has said that it feels a great responsibility for dealing with Indian rights.
The mine is in the Grants urani-

um mineral belt, where 25 companies are searching for uranium. Of the 600 million pounds of uranium ore estimated to be in the Grants belt, a region 20 miles by 95 miles, about half has been excavated since

Of the remaining 300 million pounds, about one-third is at Mount Taylor. This uranium is deposited far seven miles along the route of an ancient riverbed which is now 3,000 to 5,000 feet beneath the surface.

Yellow Cake Extract

Production of yellow cake, the raw material extracted from uranium ore, is expected to average 6 millioo pounds a year over the 25to 30-year life span of the mine, Yellow cake is selling for \$40 to \$45 a pound.

Unearthing such an ore deposit is difficult, and no longer is urani-um or other valuable minerals to be found on the surface.

Minister Backed In Australia On British Slur

BRISBANE, Australia, Oct. 9 (AP) — A state Cabinet minister who told a crowd at a weekend beer festival that "bloody poms [English immigrants] are oothing but troublemakers" was supported today by Queensland Premier Johannes Bjelke-Petersen.

They are the ones who ferment [sic] all the trouble," Mr. Petersen said. Mr. Petersen's minister for local

government, Russell Hinze, had criticized British-born union officials as the cause of many industrial disputes in Australia, including the current five-week brewery strike in Brisbane. Earlier this year the Australian

minister for primary industry, lan Sinclair, touched off a national dispute by accusing British immi-grants of importing the "British doctor or clinic to sterilize a wom-disease" — industrial unrest — to

Uranium ore is increasingly hard to find and to bring up safely, thereby making it costly. Officials at Mount Taylor will not disclose how much Gulf Minerals will spend on its mine, but one estimate

put it at \$140 million. Two shafts bave been sunk at Mount Taylor. One, 10 feet in diameter, is for delivering men, materials and to permit fresh air. The second, 24 feet in diameter, is for hoisting out the ore and drawing out exhausted air.

Both shafts will be fully complet-

ed by mid-1979. A uranium mill will be built on the surface for extracting about one pound of yellow cake from each ton of ore brought in the surface. The yellow cake then goes to the U.S. government for further processing. Tailings, the rubble left over af-

ter the uranium is out, will be piped in a slurry in an earthfill dam about seven miles from the shafts and the mill. At full operation, about 4,500 tuns of tailings will be produced

each day.

The tailings are perhaps the most

must deal because they contain radioactive radium, a health hazard.

About 20 buge piles of tailings are scattered about the Grants region, left by previous mining operations. The U.S. government recently declared the dusty piles to be a bazard and said that it will soon dispose of them, perhaps by burial.

Radon gas, which is encountered in the mine as a decay product of uranium, is highly toxic and must be pumped continuously to the sur-face, where it dissipates.

It has been found that urantum miners who smoke run a higher risk than nonsmokers for developing lung cancer. The radon gas proba bly enhances the carcinogenic ef-

satisfy the electric needs of California, Washington and Oregon for nine years.

U.S. Feminist Unit Votes To Focus on ERA Drive

WASHINGTON, Oct. 9 (WP) -The National Organization for Women vated averwhelmingly yes-terday to focus its resources during the next year on the Equal Rights Amendment ratification drive, acknowledging that its efforts on be-half of other feminist causes will be

At its annual conference, attended by more than 2,000 members and 500 voting delegates from across the country, the organization also voted almost unanimously to lobby state legislatures on behalf of the congressional amendment that would give full voting representation to the District of Columbia.

NOW, the largest U.S. feminist organization, will have 100,000 members by the end of this year and a budget of Shelling according

and a budget of \$2 million, according to President Eleanor Smeal. In contrast to past annual conferences, the meeting held at the Wash-ington Hilton bere during the weekend showed the organization to be relatively united on issues its members consider important.

While supporters of an effort to have NOW begin to focus once again on issues such as homosexual rights and abortion felt that the vote on strategy would be close, they were quickly and resoundingly defeated. A resolution to help de-feat legislative efforts that would restrict the rights of homosexuals was passed unanimously. In years past, NOW has been divided over whether it should align itself with the cause of homosexual rights. NOW also voted to continue it

efforts to insure women's ability to choose whether or oor to have abortions and voted a series of resolutions that were described by speakers as a bill of rights for After a series of close votes, the

organization adopted a resolution backing the concept of voluntary, informed sterilization for women and backing legislation that would counseled.

fects of tobacco, miners have been In the end, sufficient uranium will come from Mount Taylor to produce enough electric power to

A large number of delegates, in-

By Judy Mann

cluding many Hispanie women members of NOW, favored the recently issued federal guidelines that require a woman to wan 30 days after deciding to be sterilized and to receive counseling in that period. Mariana Hernandez, a NOW

member from New Jersey who lived in California for six years, said there have been numerous cases in California in which Mexican-American women have been sterilized immediately after they requested it during labor and childbirth. In some cases, she said, these women did not speak Englisb well enough to understand that sterilization is irreversible.

CAMUS NAPOLEON

But Historic Prejudices Persist

End of Old Regulations May Help Spain's Gypsies to Escape Centuries of Prejudice

By Scanley Meisler

MADRID - It is more than 350 years since Miguel de Cervantes, the creator of Don Quixote, summed up the Spanish view of Gypsies this way: "It seems the Gypsies came into the world only to be thieves." Until just a few weeks ago, the Spanish police still treated Gypsies as if they were, in fact, born to be criminals

Under regulations that derive from the 19th century but were re-codified in 1943 under Franco, the Guardia Civil, Spain's rural police force, was instructed "to scrupulously look out for Gypsies, check and verify their documents, observe their clothing, investigate their way of living, and form an exact idea of their work and movements, making sure where they are going and

why."

The government abolished these regulations in July, after an impassioned speech by Juan de Dios

DEATH NOTICE

DENNIS A. COLLINS, 58, American Foreign Service Officer, resident of the American Catholic Association Puris, died October 7. The funeral service will be held at 50 Avenue Hoche, Paris 8th.

Ramirez Heredia, the only Gypsy member of the Cortes, the parlia-

Evoking the image of the sanbenito, the smock worn by victims of the Spanish Inquisition, Mr. Ramirez Heredia said: "We want to be rid right now of the sanbenito that has been hung on us - that the Gypsy is the prototype of the liar and the cheater."

Deeply Rooted Feelings

The regulations of the Guardia Civil reflected deeply rooted feel-ings against the Gypsies. In May, the municipal government of Burgos halted construction of a Gypsy school after neighbors complained that it was "impossible to live together with these undesirable people dedicated to robbery and other

Heredia and other Gypsy leaders, this prejudice is compounded by the refusal of most Spaniards to concern themselves with the plight of the Gypsies, who are estimated at between 200,000 and 400,000.

In some ways, Gypsies are closer to the life of Spain than they are to that of any other country in Europe. The majority has lost the traditional language, called Roma-ny or Calo, and speak Castilian Spanish. Gypsy music and dancing

helped develop Spanish flamenco. Bullfighters with Gypsy blood are believed by Spaniards to add a special excitement to bullfighting.

Low Literacy Rate

According to a recent report of the Association for Gypsy Development, 75 percent of them live in what the Spanish call chabolas (makeshift shacks), 84 percent do not have a steady job and 73 percent of these easy job and 73 percent of these easy job and illiterate. cent of those over 14 are illiterate. The Gypsy birthrate is three times that of the rest of Spain, and the average life expectancy is only 42.
"The Gypsies," said Jose
Heredia Maya, a Gypsy poet and
professor of literature at the University of Granada, "have all the problems of an underprivileged class in a capitalist society."

With this kind of poverty it is In the view of Mr. Ramirez not surprising that Gypsies are eredia and other Gypsy leaders, caught stealing from time to time. But most Gypsy confrontations with police result from lack of papers. Illiterate and alienated, many Gypsies fail to register births and marriages with the govern-ment, so they do not have the national identity card and other documents required by the police.

Most Spaniards still believe that

Gypsies are nomads, wandering with their tents and mules. In a re-

Roman, a sociologist, concluded that only 5 percent of the Spanish Gypsy population is nomadic. She found that 42 percent of those in habolas have lived in them from 10

Typical Neighbortsood

La Celsa, on the outskirts of Madrid, is a typical Gypsy neigh-borhood. On one side of the road lies a jumble of 180 shanties slapped together years ago with wood, brick, concrete and roof tiles. Since many of the Gypsies are sometime junk dealers, there are piles everywhere of used objects old tires, broken beds, gutted

Juan Ramon Motos Munoz, 43 agreed to show the inside of his cramped *chabola* to a visitor. One of his eight children hurriedly swept garbage and dirt off the floor. The shack had a main room and two smaller bedrooms, for the family of 10. Like other chabolas, it had no toilet and no water, but it did have electricity. A large televi-sion set was in the main room.

Mr. Motos Munoz moved into the shack 17 years ago. He has little pride in the place, which did not cost him anything. He complained that the roof leaked and that it is cold in the winter. He begged for

pled by polio.

Heavy rains and floods destroyed 40 chabolas in La Celsa seven years ago, and Madrid set up prefabricated houses across tize road for the homeless. These structures, made of a masonite-like material, are somewhat larger than most chabolas and have electricity, running water, toilets and paved walkways. The improved comfort and shelter seems to have fostered some pride, and several of the prefabricated houses are neatly deco-

Black Legend

rated.

Many Spaniards believe that ies do not want steady jobs. lose Manuel Flores, a leader of the Gypsies in Cordoba and a metalworker in a factory for eight hours a day, calls this belief a black leg-

Spaniards see Gypsies only in spe-cial, odd kinds of work — the flamenco dancer, the seasonal farm picker, the street beggar, the hawker of lottery tickets and, most of all, the chatarrero, or junkman

Second, most Spaniards believe, based on literature and tradition, that the Gypsy has a spirit that can not be bent in a way demanded by modern industry. Carmen, the

Gypsy girl in the tobacco factory in Seville, is a well-known example. In his 1845 novel, on which the opera was based. Prosper Merimee wrote "For people of her race, liberty is everything, and they would set a town on fire in order to spare them-

Appeal of Liberty

selves one day in prison.

A Gypsy leader like Mr. Flores, even while complaining about the black legend, tends to agree about the appeal of liberty. He tried to explain why so many Gypsies buy and sell junk.

"The Gypsy is a nomad," he said. "He likes his liberty. He doesn't like the discipline of labor. So he looks for work of this kind."
Miss San Roman and her team. their study of the Gypsies of Madrid, found that the largest group — 34 percent — were junkmen, but to a large degree because they had little choice. If a Gypsy is not trained for any skilled work and has no knack for setting up a

Berlinguer in Moscow

MOSCOW, Oct. 9 (AP) — Soviet President Leonid Brezhnev dis-cussed international and domestic developments today with Italian Communist Party leader Enrico Berlinguer, Tass reported.

street stall, his choice narrows down to unskilled labor or the relative freedom of the junkman.

Gypsies came to Spain in the 15th century from France as religious pilgrims. Like other Gypsies of Europe, they had left their homeland in northern India 400 years earlier. They were known as Gyp-sies — Gitanos in Spanish — be-cause of a belief that they had origi-

nally come from Egypt. Their Catholicism and weaknes protected them from the kind of repression that became the lot of the Jews and Moors in Spain. But Spanish officials tried to lorce them

in 1499, King Ferdinand and Queen Isabella ordered all Gypsies to have a fixed place of residence. Offenders were to be given 100 lashes in the poblic square if male, 50 lashes if female. Authorities could cut off the ears for a second offense and banish the offender from Spain.

The position of the Gypsy has eased in this century. In the last few decades, the Roman Catholic Church has taken the lead in organizing Gypsies into associations that work for the education and eco-nomic development of their people. But, since the death of Franco in 1975 and the transition of Spain to a democracy, some Gypsy leaders

leadership and have tried to per suade Gypsies to lead their out

campaign.

Many are optimistic about the likelihood of Gypsics solving their own problems. Gypsics are partial the lumpenproletariat," said he Heredia Maya, the poet, "but the are beginning to recognize the

JOB OPPORTUNITIES ARAB PERSONNEL REQUIRED

ABU DHABI MARINE OPERATING COMPANY, the largest Offshore oil & gas producer in Abu Dhabi, offers the following job opportunities which reflect the need to build up expertise within the existing materials and purchasing disciplines with competent, dynamic and reliable personnel.

9 POSITIONS FOR SENIOR BUYERS & BUYERS

REF: MAT 47/48/78

They should be capable of negotiating the purchase from both local and world-wide sources equipment and materials including such commodities as casing, well tubulars, wellheads, cementation equipment, drilling bits, chemicals, engineering consumables and plant spares required for exploration, production and treatment of crude oil and gas.

For the Senior Buyers, the minimum requirement will be HNC or equivalent in a technical discipline or in business studies with appropriate experience of 7 years technical and commercial negotiating competence in material procurement within the oil or petrochemical industry. Complete command of English and Arabic is essential.

For the Buyers, the minimum requirement, will be ONC in a technical discipline or in business studies or an equivalent diploma with appropriate experience of 5 years technical and commercial negotiating competence in material procurement within the oil or petrochemical industry. Complete command of English and Arabic is

These posts will offer the following:-

- Opportunities for development with formal specialised training in a technical and well organised environment.
- Attractive salaries according to qualifications and experience.
- Fully furnished married/single accommodation at nominal rent.
- Annual leave at the rate of 49 days per annum with paid air passage for the employee and members of his family. Single status employees will be eligible for more frequent leaves.
- Educational assistance for children and free medical care for staff and family in Abu Dhabi.

Only Arab nationals should apply and priority in employment will be given to U.A.E. citizens.

Handwritten applications, quoting the above reference and giving full details should be submitted in English together with copies of relevant certificates pertaining to qualifications and experience separately to both the following addresses:

- 1. Senior Personnel Officer (CPA) Abu Dhabi Marine Operating Company P.O. Box 303 Abu Dhabi (UAE)
- 2. The Department of Petroleum, P.O. Box 9. Abu Dhabi (UAE)

Failure to comply with any of the above requirements will lead to such applications being disregarded.

Water Can Be Killer in Ecology Of Desert, Soviet Expert Warns

LONDON, Oct. 9 (UPI) — It seems simple. A desert is an area starved of water. Bring in water and it will bloom as it did before it turned to sand.

Dr. A.G. Babayev, of the Academy of Sciences in the Soviet republic of Turkmen, has a warning for those who think in such uncomplicated terms.

Water, he said in an article in the magazine New Scientist, can bring not life but death to a desert. The water-bearers would be guilty of killing with kindness. "Over the millennia," he wrote, "nature in the desert has accommodated itself to the 'law of the minimum' - in other words to-

conditions of eternal thirst. If the desert were to receive abundant water, everything that grows in it would die." For example, he said, the saksaul tree, the perfect basic fuel of

the desert people, would vanish, as would present grazing plants. Animal species adapted to desert conditions would lose their habi-"Desert trees and shrubs take an extremely long time to grow but

are quite easy to wipe out," he said "Before cultivating the desert, therefore, there is always a more important problem that we must consider - how to avoid harming it." The Soviet Union's 750 million acres of deserts in Central Asia

provide a harsh environment: summer temperatures above 110 degrees, accompanied by strong winds; winters with bitter frosts and heavy snowfalls. And yet, Dr. Babayev said, the desert is, in its own way, bounti-

ful. Irrigated land on the fringes provides one-third of Soviet-grown fiber crops such as cotton and hemp, more than two-thirds of the raw silk and almost one-fifth of the vegetable oil. The desert itself produces one-half the world production of the famous karakul fur, from the glossy black coats of newborn lambs of the karakul sheep.

"Soviet desert specialists believe that the economic potential of the deserts should be developed," he said, but want to avoid such mishaps as the waterlogging of the Turkmenian capital of Ashkhabad, one of the unexpected results of the Kara Kum canal, an earlier plan to bring water to the deserts.

Not all regional meetings had suggested including war-tax resistance in peacemaking efforts, but, reflecting strong sentiment here, the national conference challenged four-day conference here followed the national conference challenged 26 regional meetings involving congregations and church agencies more than 1,500 Quakers, Mennon-to:

· "Scriously consider refusal to pay the military portion of their federal taxes as a response to Christ's call to radical disciple

 "Uphold war tax resistors with spiritual, emotional, legal and ma-

terial support."

"Consider the requests of employees who ask, for reasons of moral conviction, that their taxes not be withheld."

A Mennonite newsletter, God and Caesar, has reported 33 cases of war-tax resisters within and out-side the historic peace churches. Many have merely filed letters of protest with their tax forms, but some have withheld taxes equaling the percentage of the federal budge et going to the military. Some court cases have resulted.

In several instances, employees at Mennonite institutions have asked their employers not to withhold their taxes so that they can express their faith through our tax resistance." The American Friends Service Committee has had similar

The witness of the peace churches to the New Testament declara-tion that "blessed are the peacemakers" has been consistent, says historian Donald Durnbangh, since the movement emerged at different points in history: Mennonites from the Radical Reformation (16th century), Quakers, or "Friends," from left-wing Puritanism (17th century) and Brethren from German Pictism (18th century)

ry).
"The refusal to participate in war has been matched by a persistent willingness to reach out to those suffering from acts of war, from social oppression, or from natural catastrophe," said Mr. Durnbaugh, who chaired the committee bere that shaped the final peacemaking

Pessimism, Gloom Is Widespread

Canada in a Dour Mood on Thanksgiving Holiday

By Andrew H. Malcolm

TORONTO, Oct. 9 (NYT) — Canada celebrated Thanksgiving today with turkey, dressing, corn and a day off from work. But all of the trimmings of tradition cannot hide the general absence of joy these days in this northern land as winter approaches.

Pessimism and gloom appear to pervade virtually every sector of society, from a bulldozer driver without a job to an irascible prime minister betraying the frustrations

of his job.
"I don't know," said Bill Christy,
the bulldozer driver, "I haven't
seen it this bad since the Depres-

"People think it's easy to run a government." Prime Minister Pierre Elliott Trudean snapped the other day. "Perhaps we should throw a few bot potatoes at them."

Further Groening

Canada's Thanksgiving, ob-served by law on the second Monday of October, has the same basic autumn harvest appreciation theme as the U.S. holiday. But this year the crops were adversely affected by a late spring, a dry summer and a wet fall, and the result has been a fairly good harvest instead of an-other record one. That has become reason for further groaning.

Canada, the world's second largest nation in land area, has only about 23 million persons, but in-

more than \$6,700, one of the world's highest. And it also has a skilled labor force that has seen more jobs created in the last two years than any industrialized

But what Canadians are talking about these days is unemployment, inflation, strikes, poor political leadership, taxes, severe provincial-federal frictions, controversial consotutional changes, French-English language rivahies, a sluggish econo-my and, above all, the falling Canadian dollar.

"I've never seen Canadians so pessimistic," says former Prime Minister John Diefenbaker, whose 83 years cover two world wars and the Depression of the 1930s.

Unemployment has passed the 8.5 percent level and is increasing almost monthly. Inflation is more than 9 percent a year. Taxes are increasing. Consumers pay a hid-den 12 percent federal sales tax, and provincial sales taxes, which had been almost halved all summer to spur consumer spending, jumped back to 7 percent during the week-

This week Canadians, who have already endured a nationwide airline strike and a nationwide strike of mail deliverers, face a nation-wide strike of mail sorters. Statis-

cludes vast areas that hold mineral tics show that work stoppages in wealth and 30 percent of the June totaled almost 700,000 manworld's fresh-water supply. It still days, for a work loss of 2.7 million has a per-capita annual income of days in the first six months of the year. This compares with the loss of 3.3 million days during all of last

> The problem of Quebec separatism remains strong, threatening to divide the eastern provinces physically from the central and west with a new, unpredictable, independent state. Peter Lougheed, premier of the province of Alberta, warns that centrifugal forces are at work throughout Canada, and he detects a fraying of the spirit of goodwill among Canadians necessary to maintain national unity.

Queen Is Resented

Mr. Trudeau's proposed consti-tutional reforms, now undergoing hearings, have not only aroused op-position in a number of sectors but also have raised the touchy subject of Queen Elizabeth's symbolic role in Canada, an emocional issue among some.

The Ottawa government has eased somewhat on its cootrover-sial program to push bilingualism across the country, but French-Canadians maintain that enough has not been done, while many English-Canadians complain that too much has.

"They're trying to stuff French down our throats," said one Ontar-

io college graduate who has never been to Quebec.

The economy grew only 2.8 per-cent last year. This year's figure may creep up to 4 percent. But the costs of new machinery and the uncertain strength of renewed con-sumer spending have combined to cut capital spending. The federal government in recent weeks announced a series of spending cuts in an effort to hold the budget defi-

cit to \$12 billion this year. **Dollar Declines**

The Canadian dollar, a symbol of considerable national prestige and pride, has fallen in recent months from 103 Canadian cents to the U.S. dollar to almost 84 cents — the lowest rate since 1933. Officials of the Bank of Canada

and the government are under mounting attack for an inadequate desense of the dollar. Finance Min-ister Jean Chretien complained last week that there was 100 much complaining going on in Canada these

"There's no direction," said one government bureaucrat. "What you've got is a demoralized govern-

ment."
Many believe that Mr. Trudeau
Many believe that from the main has become isolated from the main-stream of Canadian thinking. His Liberal Party's fortunes in 15 scattered parliamentary by-elections on Oct. 16 will be watched closely as a precursor of oext spring's national parliamentary elections.

Brand Bridges

"Enriched Flavor" breakthrough leads to unprecedented taste in a low-tar cigarette, MERIT.

A major advance in smoking technology has effectively bridged the gap between low tar and taste.

The breakthrough—a process called "Enriched Flavor" has made possible a remarkable new cigarette, Merit.

A cigarette which is establishing a whole new taste standard for low tar smoking.

"Enriched Flavor."

More than 2000 components of tobacco smoke were analysed one by one. Researchers succeeded in isolating certain natural ingredients which deliver taste way out of proportion to tar.

By packing extra quantities of these "key" flavorrich ingredients into a low tar cigarette, Merit was created.

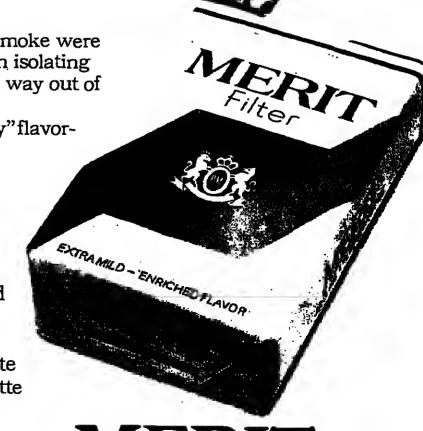

Taste Tests confirm it.

Merit has now been taste-tested among many thousands of smokers in Europe and the U.S.A.

A significant majority of smokers reported Merit delivered as much—or more—flavor as cigarettes bearing up to 60% more tar.

You've been listening to low tar/good taste claims for long enough. Now smoke the cigarette that finally gets them together.

Truly satisfying smoking and low tar too. The cigarette is Merit.

Tuesday, October 10, 1978

The New World

Since the United States has adopted a poli-cy of suiting its holidays to public convenience rather than the events which inspired them, Columbus Day has moved from Oct. 12 to the nearest Monday. But to bring back the day on which the Italian commander of a Spanish fleet observed the New World, too much precision of timing is not necessary after all, calendars as well as holidays have been altered since the Santa Maria, the Pinta and the Nina sailed into the Caribbean.

Columbus Day can be, and too often is, an occasion for American chauvinism (North and South). But it does commemorate a world event - the beginning of an expansion of Old World peoples on a scale exceeding that of the Aryan invasions; the release of vast treasures of natural resource, the creation of a stage on which new political, cultural and economic trends could express themselves. What had once seemed to offer a simple opportunity to loot, to escape from feudal bondage, to find land that had grown all too rare in the older continents, developed into a highly complex community, replete with good and evil, posing problems and holding up examples for nations and peoples around the world.

It is ironic that just as the vastness of the New World and its influence on the Old is being explored in depth, other new worlds are looming on the horizon. Not Unidentified Flying Objects, although there are many who will turn to them, or to strange imaginative faiths to escape the imprisonment of daily life in a world that suddenly seems to have little relationship with the moral and political disciplines that once ruled. There were, of course, great differences among those disciplines, whether religious, political or both, differences that led and still lead to wars and mutual bitterness among peoples. But there were also generally accepted moral codes that underlay the laws and customs of many far-flung nations. One set of these might have been poised against another - but at least the basic controls had a certain similarity, a certain stability around the world.

But the pastoral and agricultural communities that created these codes and inspirations of faith are now greatly reduced. In place of them are gross accumulations of people, not only in the teeming urban centers that have expanded in every part of the globe, but in farm acreage and pasture lands that consume more and more of the earth's surface (and even the bottoms of the sea). The areas of the world and of the universe that once offered space for mystic concepts have been increasingly explored. And so have areas of the mind and body of man that once seemed unknowable, except to the view of faith.

All of this has created confusion, has whittled away the power of old institutions, from monarchy to the family. And it is very difficult to predict what directions mankind will take in this New World it has made, not merely discovered. One could hope for a new Columbus who might link this world to what was good in the Old.

But it cannot be forgotten that when Columbus told Europe of the New World he had seen beyond the Atlantic, the immediate results were not all good. True, missionaries came to the New World to spread their old religion. But Conquistadores came, too, to dominate the dwellers in the New World, to send back gold and silver and stir the continents they had left to wars for the continents they had conquered. And there is the crowning irony of Columbus' journey, one that did not seem all that important in the night of ignorance in which he shed some light. When Columbus said his New World was India, he supplied, unwittingly, a warning to those who may be exploring today's New World of thought, emotion and ideals. To mistake what is really new for what seems to be something old and familiar, is an easy error to make - but it could, nowadays, be costly for everyone.

Why Mrs. Kreps Went to Japan

The sales trip to Japan by Juanita Kreps, the Secretary of Commerce, has its comic aspects. She is serving as a tour guide to a large delegation of American business people in hope of increasing this country's exports to Japan. Is the federal government trying to teach the standard bearers of free enterprise how to sell? Mrs. Kreps must feel as though she were offering swimming lessons to a flock of reluctant and suspicious ducks.

But unfortunately those ducks have reason to be cautious. It is very cold water, and there have been some mysterious disappearances in that pond. Successful or not, Mrs. Kreps' mission suggests the necessity of political intervention in selling to Japan. The troubles of U.S. exporters have become much more than a narrow commercial matter. Because of the effects of jobs and currency values, the huge American deficits in U.S.-Japanese trade have created serious political strain. Last year the deficit was \$8 billion, a figure that everyone agreed was too big. The Japanese government predicted it would decline this year. Instead it is rising to somewhere around \$14 billion.

The increasing value of the yen and the decline of the dollar should have cut Japanese sales in the United States, according to economic theory, and improved the sales of American products in Japan by making them cheaper. But that does not seem to be happening. Perhaps the experience of Zenith Radio Corp. offers a fragment of explanation.

Zenith is in ferocious competition with Japanese television manufacturers in this country. For nearly a decade it carried on litigation charging the Japanese with dumping — that is, illegally selling here below their prices at home. Zenith lost in the Supreme

Court last summer. The company is not

unbiased. But neither is it uninformed. Five million color television sets were sold in Japan in 1976, according to John Nevin, the chairman of Zenith, and 452 of them were imports. Because of the exchange rates, Mr. Nevin says that he could undersell the Japanese makers by wide margins in their own markets — if he could get into the market. The reasons are vague and always polite, he says, but they add up to no access. Regulatory inspections are interminable. Whole salers are slow and retailers habit-bound precisely the opposite of the sharp performance of the same companies on the export side of the equation.

Until the 1970s, Japan seemed a rather poor market and, anyway, the overvalued dollar put American manufacturers at a price disadvantage there. The U.S. government tolerated a good deal of discrimination against American goods, because it was trying to encourage economic growth abroad. Now Japan is suddenly faced with the consequences of its new wealth, and the adjustment is coming unmanageably fast.

Because Japan ran big trade surpluses, the value of the yen rose. Last year alone, it went up 38 percent against the dollar. To return to television sets, imports now represent a terrifying threat to Japan's electronics industry. Zenith's price, on the Japanese market, would be a third lower than last year. Japanese makers would either have to cut prices wildly or be undersold by vast margins. The Japanese do not seem to have the answer. American officials fear that the government in Tokyo may keep stalling indecisively on imports while the yen floats higher still. That

is why Mrs. Kreps went to Japan. THE WASHINGTON POST.

International Opinion

Rhodesian Gesture

Race discrimination at surface levels is important, and at some date now deep in history its abandonment might have put Rhodesia on the right lines. But if ever there was a time when nationalism was concerned mainly about access to white suburbs, hospitals and schools, that time has long been forgotten. More to the point, though, is the Rhodesian government's evident belief that by announcing its dramatic conversion, it can have some effect on the unfolding events. The magnanimous gesture from Salisbury, timed to supercharge [Prime Minister Ian] Smith's impact in the United States, invites the obvious question why it was not made before.

There remains, however, a danger that by enlisting American support, Mr. Smith's visit might drag out the Rhodesian conflict to even worse extremities, for the visit inflates Mr. Smith's importance at a time when it is diminishing day by day. The discordant meeting of front-line presidents in Lusaka at the weekend is much more relevant to the foture of Zimbabwe than anything Mr. Smith may do or say in Washington, for it further illustrates the deep divisions between the ZAPU and ZANU wings of the Patriotic Front and their presidential backers. It is to containing these divisions that American attention now needs to be devoted.

-From The Guardian (London).

In the International Edition

Seventy-Five Years Ago October 10, 1903

WASHINGTON - Because the members of the White House staff believe that information concerning the arrests of demented persons seeking to see the President has the effect of inviting others to embark on similar missions, as happened last week, the President's secretary and the chief of the secret service gave notice today to every employee of the White House's secret service men and policemen, that news regarding "cranks" must not be made public. The command is made forceful by the addition of suggestions as to the fate of those who disobey.

Fifty Years Ago October 10, 1928

ST. LOUIS - The New York Yankees established themselves beyond all argument as the most powerful aggregation ever assembled in the history of baseball when they annihilated the St. Louis Cards, 7 to 3, to win the 1928 World Series in four straight games. Babe Ruth tied his own record of three home runs in one series same and made it possible for the Yanks to create a new mark of five four-baggers in one game, as Lou Gehrig today contributed his fourth of the series. The Bambino had a phenomenal series, batting an average of .714.

A New Social Logic Coming: Frugality

By Warren Johnson

trial society. With the emergence of chronic unemployment, rising prices and unresolved social problems, some key factors affecting the basic conditions of our lives seems to be slipping beyond our control.

The old utopian visions no long-er move us, and new ones seem powerless before the momentum of modern industrial society. For the most part, we simply ching to the present rather than face the fearful prospect of deterioration and col-

It is understandable that a grow ing element of pessimism should have entered into our view of the future. After a long period of confi-dent expansion — an expansion that we came to assume was the order of things — we are now starting to come up against barriers. As we explore these barriers we discover that they are stronger than we expected and that, in some cases, they actually expected. actually appear to be pressing in on

We seem to be working ourselves into a corner. The hoped-for tech-nological breakthroughs to unlock the passage through these barriers have not appeared. Traditional lib-eralism and conservativism, both of which claim credit for the era of expansion, now seem equally un-

In the Past

In the past, we have been able to push aside everything that stood in our way. After each successive effort, the subsequent push has required more force. Now we are at the stage where we cannot muster the tremendous power needed to continue the process. In some ways, we are not even able to hold on to what we have gained. As a society, we might prefer to keep things the way they are now, but as time pass-es, this will not be an alternative. As the frontier era of the 19th century passed, so will the affluent era of the 20th. We will have less and less choice but to turn toward fru-

ganty.

I am regularly surprised by the frequency of one specific response to the prospect of moving toward frugality. Many people fredy express their own willingness to move toward a simpler way of life, but they do not believe others will do the life simpler as if expressed less. so. It is almost as if everyone else will somehow be immune to the

pressure that scarcity generates.

The wealthy will somehow be able to hold on to their wealth and their position; the middle class will not accept a reduction in their affluence and easy life; the poor will not forgo their chance to have what others now have. Government will somehow be able to keep taxes high no matter how much the economy declines; and labor unions will contimue to push up wages no matter how much unemployment there is, while corporations will continue to pull strings worldwide and main-tain profits even if trade drops off.

Perhaps this expectation is the basis for pessimism about the future: without economic change there would be little basis for per-sonal change, and there would in-deed be grounds for pessionsin about the adjustment to scarcity.

Violence

But the only real question is whether we will move toward frugality efficiently and peacefully,

without violence.
There may well be more government action to ensure that we all pull together, more profits to motivate industry to undertake bad investments and less that is natural, less that is beautiful. It is not an attractive vision, doubly so, since it is not likely to work anyway. Higher prices, unemployment, inflation and the prospect of greater social control and political conflict will slowly cause us to turn away from any such effort.

The old order will try to urge us on; its leaders have a heavy personal investment in things as they are, in experience, education and income. They will say that to turn away from the effort is to retreat from the qualities that made this country great. But the conditions that created this country were rare and unique - a wide-open continent and new technologies to exploit its resources. These conditions will not return; there is no way to recreate the frontier. The Industrial

pansion is clearly seen to be over, the social values it fostered will lose their power and usefulness. When opportunities abounded, it made sense to give up long-standing ties to family, friends and community for something better elsewhere; those who stayed behind be came lost in obscurity. With the economic stakes so high, it became worthwhile to put every last ounce of competitiveness into the process.

But as resources grow scarce, mobility declines and decentraliza-tion occurs, all of this will slowly change. A new social logic will as-sert itself. Fewer resources will mean that sharing and cooperation will be functional if the frugal life is to be a good and full one. With less mobility and closer communities, it will not be necessary to rely on government so much for protection. In the future, there will be fewer op-portunities for the exploitive self-centeredness so characteristic of

present society.

Traditions are simply devices that evolve over long periods of time to make life richer and more satisfying. In a sense, they are con-nived devices to get people to do what is in their own best interests as well as in the best interests of their community. All societies have them; it is only our obsessive indi-idualizes that her course to deny vidualism that has come to deny the validity of traditions, to say

al's full development. Stablity

In fact, the effect of traditional systems of conduct is just the opposite: they provide a stable frame-work for individual fulfillment. In traditional societies, the age-old question of whether people are basically good or evil is answered very simply; all individuals are assumed

OS ANGELES — A growing Revolution is ending but we are to have tendencies toward doing clement of fear hannts our left with its machinery.

As time passes and the age of extone encourage the good and restrain to encourage the good and restrain to encourage the good and restrain the bad through the establishment of acceptable modes of behavior — through traditions.

Because our beritage is so diverse, we have an unusually large reservoir of these products of cul-tural evolution to draw on as our own cultural evolution takes place. Our own heritage is our greatest resource, and the exotic, imported philosophies that sometimes inter-est us now are likely to turn out to be more a reflection of our alienation than anything clse.

Our social and ecological situation is a new one, and so it is inevi-table that the future will bring with it new ways of thinking and acting. But if history can be used as a guide, it is likely that the most important social advances will come from the revitalization of elements from our own past that have been lost under the force of events. The stage would seem to be set for such an advance at this time.

.We are already being forced slowly and against our will to hus-band resources. Scarcity is the mechanism that is inexarbly diverting industrial society from the path of sustained growth that has char-acterized the modern era.

Slowly Learn

People will slowly learn to redis-ibute themselves to be able to ntilize available land and resources more easily, and to avoid increasingly expensive transportation. As mobility is reduced, the traditional basis for responsibility to one's community and environment will be re-established; people will have to live with the consequences of their actions rather than escape the effects by moving away. As comles Times with
munities become more necessary, Club Books.

the values that support them will strengthen, filling the void left by our growing disillusionment with modern values and the large-scale ndustrial economy.

The timeless virtues of loyalty, cooperation and selflessness — all thinly observed now - will once again be functional as will the sim-ple pleasures of family and friends, the knowledge of a trade and the comforts of a well-known environment. All this may seem to many to be unpragmanic idealism. But it is a strategy for survival.

The future will perhaps be less spectacular than the optimists and

the technologists may like to see it. They might speak of the loss of will to challenge obstacles, challenges our forebears would have relished, and they might lament the loss of the robust Renaissance spirit that was the mark of modern man and took Western civilization so far. But they might also forget that Ma-chiavelli was as much a Renais-sance figure as was da Vinci. By the same token, the future will be less dark and forboding, less strange and alien than the pessimists see it.

The fear of modern society collapsing from its own weight and rigidity will be reduced as the future evolves away from its present dependence on machines and toward a way of life that is down-to-earth and lamilar, a life based on sim-plicity and the frugal use of resources. How good a life it will be depends largely on the quality of shead of us.

Warren Johnson, chairman of the geography department at San Diego State University, is the author of the forthcoming book "Muddling Toward Frugality," from which this has been excerpted by the Los Angeles Times with permission of Sierra

A Last Chance to Save Rhodesia

By Anthony Lewis

WASHINGTON — Ian Smith's ed States with Smith. But they have visit to the United States has outraged African leaders, who consider him a symbol of racism. It is a bitter pill, too, for British politisider him a symbol of racism. It is a bitter pill, too, for British politi-cians, who have been trying for years to end his regime in Rhodesia. The reactions are understandable, but they miss the irony of this

Ian Smith is no longer the issue in Rhodesia. He matters; diplomats have to deal with him. But he and the tiny white minority he represents cannot control events, and they know it. In a little while, probably not more than a few months, he will be out of office. His successors will be black.

The issue now is which blacks will govern Rhodesia — and how that will be decided. Diplomacy is in a race with violence, and it is los-ing. Diplomats usually find some ground for hope; that is their business. But talk to them about Rho-desia these days, and one finds little hope of even a moderately peaceful transition to black rule.

In most of the black African countries that gained their inde-pendence in recent years, one party and leader became dominant during the anti-colonial movement. The whites feared that, but in the end it proved easier to hand the government over to a single black power structure. Kenya, where the British imprisoned Kenyatta and then came to trust him, is an outstanding example.

Black Divisions

In Rhodesia, the overwhelming black majority — 96 percent of the population now — has long been politically divided. Black leaders have spent as much energy maneuvering against each other as opposing the white rulers. The whites naturally took advantage of the divisions to help maintain their own power. But now they find themselves compelled to hand it over at a time when black divisions are at a level of fratricidal violence.

Three black leaders have joined in Smith's "internal settlement": Must Rhodesia, which should play a large part in improving the economic life of that whole region of baningi Sithole, who is in the Unit-

Rhodesia agree that support for the three black leaders has been slipp-ing and that more and more of the countryside has been coming under control of the guerrillas.

A victory for the guerrillas' Patriotic Front would not promise unity

The front's two leaders, Joshua Nkomo and Robert Mugabe, have kept their armies separate — and might well fight each other for ultimate power. That is why so many diplomats fear that the present guerrilla struggle will turn into a full-scale civil war.

Tribal Feeling

Smith is here arguing that the United States should support the internal settlement because its opponents are "Marxist terrorists." But no one who knows Rhodesia believes that the conflict is such a simple matter of ideology. Tribal feeling and personal ambition have much more to do with the divisions among the black politicians.

Thus, Mugabe is a member of the Shona-speaking group, the larg-est in the country, and his army is drawn almost entirely from its numbers. He is a proclaimed Marxist, but there is a widespread belief that in a showdown he might be joined by Bishop Muzorewa, who is also from the Shona-speaking

Nkomo, an old-time politician who takes support wherever he finds it, uses Soviet arms but has close ties to Western multinational

corporations.

The relationships are complex. But the simple, depressing fact is that diplomacy has not been able to produce agreement among the significant actors in the Rhodesian drama Major American and Brit-ish initiatives over the last few years have made some progress, but never enough to stop the momentum of war.

Is there really no hope now?

and Sithole want: support for the internal settlement. But their arguments, as voiced Sunday on NBC-TV's "Meet the Press," ignore an unpleasant but inescapable reality — the success of the guerrillas.

Smith talked of proceeding with an election, but observers in Rhodesiasay it would be impossible to hold one in much of the country. Sithole said many guerrillas were secretly loyal to him, but that claim is treated as a bad joke in Rhodesia.

If we supported Smith and his colleagues now, the certain result would be an anti-Western turn by the moderate African states -Nigeria, for instance, which is of great importance to us now. Very likely the Cubans would be invited into the Rhodesian struggle. But there is one last, bold alter-

native. That is for Britain, with American support, to reassert its authority in Rhodesia — and hold the ring among all the competitors during a transition. That would require a large investment of men and money, and much courage. But a growing number of informed British and American observers spanning the political spectrum from right to left have been talking about this idea. At the moment, af-ter all, nothing else but disaster is

'Think Big.' And Small. On Taxes

By Colman McCarthy

WASHINGTON — With an election a month away, the emerging code word is "big-spending liberal." Voters are sick of got ernment waste, weary of politicals who solve problems by throwing money at them, and blooded in the solve problems by the solve problems by throwing money at them, and blooded in the solve problems by the solve problems by throwing money at them. their hides by victous tax bites. Linerals, it is being said, are the big spenders and wasters. That a purbord of the species like Don Flash was defeated in Minnesota makes in the villaint are being that the villaint are being that the villaint are being the principle. clear that the villains are being smoked out. At last,

As with all political code words

— "law and order," "national
security," "peace through
preparedness"—a legitimate sens,
ment is being garbled by short
hand. What is lost in the transhtion of "big-spending liberals" is
that much for the opposite case can
be made.

be made.

In Congress, it is the knees of hearty conservatives like Barn Goldwater (R-Ariz.), Carl Curti (R-Neb.), Strom Thurmond (R. S.C.), John Tower (R-Texas), John Rhodes (R-Ariz.) and others the jerk when tapped by the rubble hammer of a money bill for the expensive favorites — weapons perhaps, or dams, agribusiness subsidies of power plants.

The careers of Goldwater, Curi and Tower are testimonies to the magical skills at earning reputions as being anti-big spendig while having voting records grand spending for military pregrams. Being Western-state of servatives, they are bolstered by it image of the cowboy: the self-relant bardworker whose boots has aut, hardworker whose boots ha those sacred straps by which conservatives love the poor to puthernselves up.

Standing Tall

As for the powerful and wealth—those already standing tall.

Western conservatives protect the well through their work on the Se ate Finance Committee. Billions dollars of tax loopholes have be written over the years because Ser Curtis and Clifford P. Hansen (1 Wyo.) have wielded the largest m gaphones when some cheerleadin was needed for tax breaks and six ters for the special interests.

If conservative voices are saw for other causes, it is to denom the "big-spending liberals" w back programs for inner-city hoi ing, civil rights, food stamps, poll tion control or the welfare po-The contradiction here is that the programs are chronically und funded. The Children's Defer Fund, for example, is fighting the year for several bills involving memory for education and heal but even if a few more pennieri squeezed out of Congress, o about 25 percent of the eligical children will be served. It was Society programs began: Legal S vices met only 15 percent of need, Job Corps only 20 percent.

Has it ever been acceptable fund, say, weapons programs only 15 or 20 percent of what armed services committees patric cally define as the need?

The message from this mix ironies and contradictions is the you are a big spender if you w to lay out government money people, but you are fiscally respectively in the people of the you are fiscally respectively in the people of the you pump money in weapons, dams, nuclear populants. You are a screwy-head liberal if you want money for precess to feed children or to clean in the year. filthy air. If you want more nucl aircraft carriers or missiles, you everything a fine American cowl should be: tough, hard-talking anot one to be shoved around by effete feds in Washington.

Offstage Costume

Much of this is almost laughal the Goldwaters and Curtises in tume as fiscal watchdogs, when stage they are lapdogs of the spe interests. But the trouble is, whipping up the public to go a the Don Frasers, a national dis-sion is less and less possible on full issue of spending and to Three searching questions are b asked by citizens: How do we: inflation? How much of our t income should go to governme. And what should we spend it of

Every analysis of Proposition affirms that citizens are willing think big. Code words about life spenders do not more than send public back beneath its rock; the message "think petty." I for someone to blame, not some to follow. And if a leader does erge — perhaps a president dares cut money for useless a projects or defies the militar halting funds for a bomber him down to size. Then, with a one thinking petty together, won't notice how small we

'Comique' Reopens With Clever Gounod

DARIS, Oct. 9 (IHT) — The Operation of the process of the season in more than five years, a welcome event in itself and one made even more so by the revelation of Gounod's "Le Medecin Malgre Lui' as an unjustly ne-glected comic opera and by the presence of an outstanding new French singing actor in the title

why Gounod's work should have been so generally underestimated been so generally underestimated by the operatic public is something of a mystery. It is more or less con-temporary with his "Faust," so hardly the work of a beginner, and it was a success when it was first produced in 1353 at the Theatre Lyrique. Its liberty could bertly Lyrique, Its libretto could hardly have better parentage, Moliere's comic masterpiece having been only slightly adjusted for musical treatment by the expert team of Jules Barbier and Michel Carre. Yet the occasional modern revival has not generated much more than condescension from critics and

When the curtain went up at the Salle Favart on Friday, it seemed that even the producers thought Gounod needed a hand from Moliere. Jean-Louis Martin-Barbaz, the stage director, concocted a mon-tage of scenes from Moliere's plays - using actors from his own company - musically decorated with

times poisonous enough to kill.

hour, but as it was about to wear out its welcome an improvised stage was unfolded on the Comique's own stage, the actors in 17th-century costumes mingled with others in 19th-century getup to form an onstage audience, and the opera itself began.

This clever transition was made all the smoother by the slight whiff of Lully's manner in Gounod's overture and the adroit way in which Pierre-Yves Leprince's imprompts stage and colorful costumes hridged the gap between centuries

As Sganarelle, the woodcutter-turned-doctor, the young French baritone Jean-Pierre Lafont oot only sang with the clan and well-focused tone of a future Figuro, but bounded around the stage like a trained acrobat and tossed off Moliere's comically inane lines like a product of the Comedie Fran-caise. Indeed, the entire cast sang and acted with tremendous verve, an occurrence rare enough on the operatic stage that it should be accounted a triumph for stage director and cast alike.

As for Gounod, aside from its occasional deft evocation of the 17th century and allusions to Italian opera buffa, the music of "Le Medecin Malgre Lin" falls squarely in the 19th-century French opera comique tradition, hut with a personal mastery that permitted Gounod to avoid eliches. At its slightest it is light-handed and agreeable, and at its best it is full of unexpected and witty turns of phrase and beguiling melodies - in short, altogether worthy of Moliere. Sylvain Camworthy of Mollere. Sylvain Cainhreling, the young conductor, not
only delivered the score without
cuts, but with suppleness and an
acute sensitivity to its variety.

The cast in general delivered
Mollere's archetypes with a variety

of personal touches, especially Jules Bastin's heavyweight buffo Geroote, Jocelyne Tailloo's ripely comic ourse Jacqueline, and Mar-tine Dupuy as Sganarelle's feisty spouse. Daniele Perniers was pert and amusing as Lucinde, whose rebellious loss of voice is the malady in question, and as her swain. Leandre, Christian Jean - like Lafont, a graduate of the oow-defunct Opera Studio - displayed a pleasing light tenor, although not the stage presence of some of his

"Le Medecin Malgre Lui" con-tinues in repertory at the Opera Comique (Salle Favart), with nine more performances through Nov.

On the Arts Agenda

Two Soviet artists, mezzo soprano Irina Arkhipova and baritone
Yuri Mazurok, are in the cast of the
oew production of Verdi's "Il
Trovatore" that will have its first performance Oct. 10 at the Grand Theatre in Geneva Martina Arroyo will sing Leonora and Giorgio Casellato-Lamberti will be Manrico, with Nello Santi conducting. The production is by Peter Busse, stage director, and Roland Aeschlimann, designer. Other performances are scheduled for Oct. 13, 16, 19, 21 and 26.

An exhibition devoted to the work of the three Le Nain brothers mitended as a tricentenary homage, the last of the brothers. Mathicu, having died in 1677—has opened in the Grand Palais in Paris, where it will run to Jan. 8. Aside from the works in the Louvre collection the works in the Louvre collection, the exhibition has assembled most of the Le Nain paint-ings in the world's public museums, ootably from the National Gallery in London and the National Gallery in Washington, as well as a cumber from private collections, several of them recent discoveries or never before shown in public. A section of the show will include works formerly attributed to the Le Nains or hy their contemporaries.

IRCAM, the musical research center headed by Pierre Boulez, will give the first public performances this month in its experimental Espace de Projection with two pro-grams of world premieres given in conjunction with the contemporary music festival of Donaneschingen, West Germany. On Oct. 13, 14, 15 and 16, the Ensemble InterContemporain under Peter Eotvos will perform "Arcus" by York Hoelier and a work by Balz Truempy, both commissioned by IRCAM. On Oct. 25, 26, 27 and 28, Eotvos and Karlheinz Stockhausen will be the conductors for a new work by Stockhausen and Jean-Claude Risset's "Mirages," both commis-sioned by Donaueschingen.

The Orchestre du Capitole of Toulouse, under its musical direc-tor, Michel Plasson, leaves Oct. 13 for its first tour of North America, with concerts scheduled in 14 cities with concerts scheduled in 14 chies through Nov. 8, among them Moo-treal (Oct. 16), Kennedy Center in Washington (Oct. 20), Carnegie Hall in New York (Oct. 23), Atlanta (Oct. 27), New Orleans (Oct. 28) and Mexico City (Nov. 6 and 7). The mainly French repertory for the tour includes Ravel's "La Valse" and the Piano Concerto in G. Saint-Saens' Piano Concerto No. 2 (with Phillipe Entremont as soloist in the concertos), Chausson's Symphony, Faure's "Pelleas et Melisande," and Bertioz' over-

ture to "Benvenuto Cellini."

Jean-Philippe Lafont tossing off Moliere one-liners.

Theater in Ireland

Synge's 'Playboy' Is a Hit In Dublin Dance Version

By Noel Goodwin

DUBLIN. Oct. 9 (IHT) — The teenage girl sitting behind me at the Olympia Theater jumped to her feet at the curtaincalls, put two hypersecond by a dull moment. fingers in her mouth and produced

ooe of the most strident sportsmatch whistles I have ever had blown down my neck. She was merely setting her seal of approval on a new version of "The Playboy of the Western World" — oot the original comedy by J. M. Synge, but a ballet derivation created by Joan Denise Moritana and est to runsie by Iraland's

arty and set to music by Ireland's outstanding folk-musicians. The Chieftains. (The group is due to open a North American tour this week at New York's Carnegie Hall; their fans, together with those of the Irish Ballet Company, has made this "Playboy" the bottest ticket of the 20th Dublin Theater

Distinctive

With the help of public funds from the Republie's Arts Council, Miss Moriarty has in five years built a distinctive national ballet company. It is modest in scale -17 dancers - but excellently suited to its primary task of performing to professional standard classical and modern works in small halls throughoot the country. The company's repertory has a triple hase: scenes or pas de deux from accepted classics, modern ballets by choreographers from Britain, the United States and elsewhere fincluding the gifted Israeli-born Domy Reiter-Soffer, artistic adviser to the company), and the classical-cum-Irish folkdance idiom that is

Miss Moriarty's province.
"Playboy" is Miss Moriarty's first major-scale production - a two-act ballet based on a play she has always deliberately avoided seeing because it might have affected her choreographic visualization of it. So, with the help of the jigs and reels and plaintive laments of The Chieftains, and aothentic instruments - pipes, tin whistle, bodhran, fiddles, harps and concertina — she has portrayed the characters of Synge's County Mayo in a

light humour, and, despite a certain,

All the Characters

It is not so much "a dance ver-" sion of the play," as the program calls it, as a freestanding radiscovery of Synge's characters: Pegeen; who runs Flaherty's shebeen; her gormless cousin Shawn/ Christy Mahon, the husband-hunting Wid-ow Quin, and their asserted relations and neighbors. Three of the play's four scenes take place in fieshebeen, for which Partick Munay designed a spare set of wooden-beams and minimal props, brilli-antly evoking mood and location. The remaining scene is an ingeniously staged account of Christy's at victory in a comical pony race.

Sean Cunningham, with a fine mixture of buoyant dancing and crafty character, is an admirable Christy, With winning charm and to great sense of personal humor \1" Anna Donovan creates a memorahie Pegern; she sustains the ex-hausting role with skilled dance technique. Her vivacity and expressive parasing throughout is the essence of the Moriarty mixture. Irish folkdance with overtones de classical ballet, and set dance our danced story-telling. Multiyear Contracts Make Outlook Dim

CLEVELAND, Oct 9 (AP-DJ) — Some company paymasters and government economists say a surge in labor costs is rapidly pushing up the cost of making and marketing innumerable consumer products and that a consequent further jump in consumer prices will fuel de-mands for still higher pay increas-

es.

Big contracts expire next year in the oil, trucking, electrical-equipment, rubber and ann industries. Expensive multiyear accords in these industries may well saddle the economy with an inflationary wage pattern for the oext three years or ITT has been concerned about a

system using products of Digital Equipment Corp. that L.M. Erics-son, one of its biggest competitors abroad, has been selling in Europe. In analyzing the reasons for the grim outlook on inflation, many ousinessmen and economists begin by ooting the emotional impact of the highly visible surge in food prices early this year.

The other factors behind the cur-rent spurt in inflation are really "I don't want to spend too much time on this," Lyman Hamilton, ITT's chief executive officer, re-

more important because, unlike food prices, they will not be altered by a mere change in the weather. Among these looger-term factors are increases in the minimum wage, in Social Security taxes and in unemployment-compensation lev-ies; higher prices of many imports because of the deciming dollar against some key currencies; cost-of-living escalator clauses in many current labor contracts; a shortage of skilled workers, such as machinists and engineers, forcing employ-ers to bid up these employees pay, and the tendency of nonunion workers, sooner or later, to get fatter pay raises, too.

So far, moreover, the Federal Re-serve System has supplied the econ-omy with the huge amounts of additional money needed to meet these higher costs.

James Frame, International Business Machines' chief programmer, and made him director of programming for all of ITT, Mr. Hamilton The upward pressure that these forces are exerting on payroll costs is being made especially damaging by a persistent lag in labor's productivity. said Mr. Frame has "only one assignment," and that is: "In five years, ITT is going to be second only to IBM in the efficiency and

"Compensation increases will probably be around 9½ percent both this year and next, while the gain in productivity will do well to match the dismal 1.6-percent aver-age of the last six years," said Ted Gibson, an economist at Mellon Bank in Pittsburgh. "Thus, the year-over-year increase in unit labor costs - which essentially defines the underlying rate of inflation -- will come perilously close to 8 percent," he added. That underlying rate, which strips away shortterm influences such as the weather, was generally estimated at about 6 percent in 1977 and 1976.

Labor contracts that include pay increases tied to the cost of living nowadays comprise about 60 percent of contracts signed, up from 39 percent five years ago. In them-selves, such provisions are not very inflationary; ordinarily, in fact, they reimburse employees for only 50 to 70 percent of purchasing power lost through inflation. But usually they come on top of herty wage settlements, and the combina-

al months ago, when it launched its attack on IBM with the advanced tion becomes costly.

The pulp and paper industry is bargaining over new contracts, and communications system.

IBM, meanwhile, has problems with economy of scale in smaller some early accords have exceeded data-delivery systems equipment, although it is introducing some digital-switebing equipment 10 percent a year. Times Mirror Co., publisher of The Los Angeles Times and other publications, granted wage increases of 10.75 percent the first year and 10.5 per-cent in the second year of contracts for some changes.
A spectacular explosion and six- Norway, Finland covering two paper mills.

Southern California supermarkets recently agreed to three-year contracts with retail clerks that in-creased salaries 13 percent in the first year, says a spokesman for the Ralph's Grocery division of Federated Department Stores. The rederated Department Stores. The three-year package of wages and benefits will raise hourly costs 33 percent "and the wage increases will be passed through in higher prices," he says.

And Owens-Corning Fiberglas sattled three-year agreements at

settled three-year agreements at four big insulation plants with wage-and-benefit increases averaging about 35 percent for production workers and about 37 percent for skilled craftsmen. The agreements include a cost-of-living escalator that will raise wages any time the consumer-price index climbs more than 7 percent for a full year. Moreover, the escalator - unlike those in previous contracts -does

denominated European issue not have any upper limit. He said the main objections of the government likely will center on the fear that such bond issues Nonunion workers' pay also is climbing rapidly this year. For instance, TRW Inc. expects its nonunion salaries in the Cleveland area to rise 8 to 9 percent this year, with nearly half of that coming the foreign currency markets and would further increase the yen from living-cost adjustments.

FINANCIAL NEWS AND NOTES

Esmark Sees Higher 4th-Quarter Net

Esmark Inc. will post "significantly higher" earnings in the fourth quarter ending Oct. 29 from the year-ago period's results, Donald Kelly, president, says. Earnings for the fiscal year will be higher than the previous year's consolidated earnings of \$11.7 million, or \$3.60 a share, be says, but adds he can not confirm analysis' projections of \$4 a share for 1978, although "it sounds like a good oumber." He says Esmark is keen to create a company structure flexible enough to encompass broader diversifica-oon, particularly in consumer-related activities, such as personal products, food services and packaged automotive consumer goods, while disposing of less profitable interests. He says Esmark will prudently expand its activities in these fields and intends to make related acquisitions, based on an exchange of shares as was the case in the merger of Pemcor into an Esmark unit. Although he declines to specify what companies will be acquired. Esmark is discussing "a bost of those kinds of situations," he affirms. He says Esmark's International Playtex unit expects to acquire Walleo, a unit of the Swedish pharmacenticals group Astra AB, by the end of the year.

American Natural Buys Bates' Units

American Natural Resources agrees in priociple to pay \$123 million for Bates Manufacturing's two subsidiaries that own coal lands. The agreement also would eliminate the debt of about \$4 million that Bates owes its subsidiaries. The two units, Virginia Iron, Coal & Coke and Avery Coal, lease their coal lands in Virginia, Kentucky and Pennsylvania to

mine operators. If the accord is carried out, Bates says it would ask its shareholders to approve a one-year plan in complete liquidation, providing for distribution to shareholders of its net assets after payment of bank debt, taxes, expenses and cootingen-cies. The agreement is subject to a definitive accord and to approval by Bates' bolders and by both

Hyundai, Westinghouse Form Firm

Hyundai and Westioghouse Electric will form a joint venture company in Seoul to produce and mar-ket ouclear reactor facilities and conventional generation equipment. Although details were not available, sources put the cost of the company at \$100 million. Hyundai says 40 percent of the equity will be put up by the U.S. concern.

U.K. Car Sales Jump 28.3%

Car sales in Britain spurted 28.3 percent from a year earlier to a record high for September of 132,761, the Society of Motor Manufacturers and Traders says. For the first nioe months, new-car sales increased 23.5 percent in t.31 milbon. Sales for 1978 are expected in be close to the record 1.66 million cars sold in 1973. Imported cars accounted for 50.7 percent of all sales last mooth, compared with 50.5 percent a year earlier. Sales of Japanese cars io the first nine months rose 27.6 Pc to 146,946, io-creasing their share of the market to 11.2 percent from 10.8 percent a year earlier. Japanese car sales for the nine months of this year exceed the figure for all 1977 when a record 140,415 Japanese cars were sold in Britain, taking 10.6 percent of the market.

Short-Term Investing Worries Wall St.

NEW YORK, Oct. 9 (AP-DI) — likely to cause some uneasiness on Of immediate concern on Wall the labor front. Street these days is the way many Institutions are, therefore, generinstitutional investors have become ally oegative for the oear term, and short-term oriented in plotting in-westment strategies, thereby pro-ducing an uneasy air in the stock tain environment, analysts say.

Stock prices recently have been pursuing a narrow range, showing little cooviction on either the upside or downside. There is likely to be more of the same indecisive pattern, analysts say, should investor worry persist over the dollar, inflanon and rising interest rates and about the wage and price guidelines that President Carter soon will

"Everyone's asking about the coming wage-price guidelines and their possible effects, and the subiect will certainly be on the market's mind for some time," says dent at Butcher & Singer Inc., of Philadelphia, says the "only safe course" is to take a defensive and chairman of Oppenheimer & Co.'s investment policy committee.

The guidelines are likely to have situations. ittle effect on wage oegonations by organized labor, says Mr. Miller is creating uncertainty in the marbut the prospect of their enforce-

'Centions' Position

"We have assumed o very cautious investment position as we be-lieve that what we are facing is not only cyclical inflation but secular (long-term) inflation that's likely to become more critical in the months ahead and could get worse," says Charles Miller, president of Funds Advisory, of Houston, which man-ages about \$1.2 billion. The key problem that he sees is "the failure of the government to recognize the

real causes of inflation." Charles O'Hay, senior vice presi-

favorites, and fear that margin debt will nowind, due in high interest charges, leaving poor volume and lack of price support in its wake," he says. On the positive side, he sees an improving technical pieture insofar as short-term trading indicators are concerned, and the existence of still high levels of domestic institutional cash with which high-grade equities could be bought.

He estimates that after a "basing period" this mooth through November in the low to mid-800s in the Dow Jones industrial overage, the market may elimb to 970 to or even 1050 by mid-1979 "before the oext true bear market begins." Such an optimistic forecast for

oext year is partly doe to expecta-tions by some analysts that inflation and interest rates will moderare by then, following the onset of a mild recession. Irwin Kellner, vice president and economist at Manufacturers Hanover Trust, sees some "buying opportunity in the market between now and the end of 1978," when he expects the industrial over-age to stay around 850.

The market will come alive next year, as funds begin to move from ment and possible impact on big a worsening monetary, economic fixed-income securities to equities, union contracts, such as the Teamsters' contract coming op soon, is nical damage to recent market lower interest rates," he says.

Prices Gain On NYSE; Dow Up 13

Firmer Dollar Aids Rally by Glamours

NEW YORK, Oct. 9 (Reuters) --A rally by glamours and hlue chips drove prices on the New York Slock Exchange sharply higher to-

day in light trading.

Analysts said the technical strength of the market got an added lift from the slightly firmer tone. for the dollar, but trading was slowed by the Columbus Day bank

The Dow Jones industrial average rose 13.07 poiots to 893.19 and advances led declines 1,003 to 435. Volume fell to 19.72 million shares from Friday's 27.38 million.

Inflation counselor Robert Strauss said the administration's promised anti-inflation program probably will set precise wage and price targets. He said a 5.75-percent annual guideline for prices and 7 percent for wages are to the "gener-

al ballpark."

Pillsbury rose 1: to 42's. The company said it and Green Giant signed a definitive agreement for the combination of the companies and will begin its cash tender offer tomorrow for up to 1,8 million shares of Green Giant common at \$37.25 a share.

Among the glamours and blue chips, 1BM climbed 3¹⁴ to 282, Hoocywell 2¹⁶ to 68¹⁵. Du Pont 2¹⁶ to 135¹⁶. Monsanto 2¹⁶ to 59¹⁶. Unioo Carbide 1's to 41's and Dow

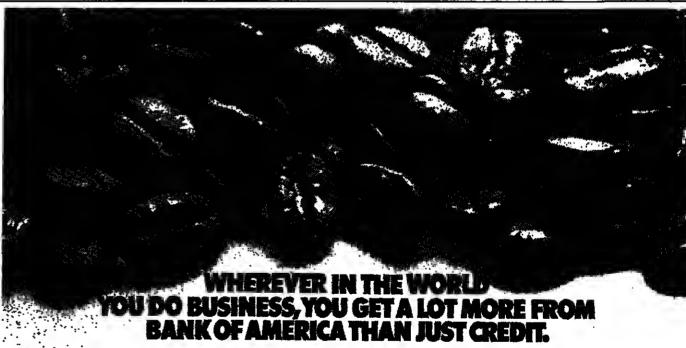

Chemical 114 to 3014, Smithkline gained is to 9514, Merck 114 to 60, Alcoa 214 to 5114, Alcan Aluminum 115 to 3634, Boeing 114 to 6434. Eastman Kodak 15 to 64%, Polaroid one to 52% and Teledyne 224 to 104.

Prices oo the American Stock Exchange also rose sharply. The index added 1.26 points to 171.49.
Sundance Oil gained 2½ to 22½ to top the active list. Prudential

building Maintenance added 31/2 to 10%. Resorts International A and B did not trade pending news after complaints from New Jersey gaming authorities.

In Chicago, grain and soybean prices rose on the Board of Trade oo a lack of barvest-time selling and expectations of strong export Reports that Brazilian drought

may damage new soybean plant-ings there led to some buying in soybeans,

At Bank of America you get all the financial services you'd expect from one of the world's largest banks. But you get more than that-and you get it fast!

For instance, we've streamlined our organizational structure so that now you can get the decisions you need right on the spot in your part of the world. And we've established a sophisticated communications network that even uses satellites to speed up the process of gathering financial information for you from all over the world.

But best of all when you deal with Bank of America, you get a total commitment to quality. Our people are carefully trained to be responsive to the needs of each and every customer. Take our industry specialists. They each know just about everything there is to know concerning the industry in which they specialize. And their experience and advice are yours for the asking.

So whether you're growing coffee in Guatemala or distributing it in Hamburg, come to us for any kind of banking assistance you may need. And see how much more you get at Bank of America.

Ennia: making an international name in insurance

Ennia were formed in 1969 from the merger of two long established Dutch insurance companies, the older of which was founded in 1859.

And, though we aren't exactly new, its true to say that the insurance. financial and business worlds probably knowless about us than is good for either them or Ennia.

We are, in fact, one of the largest insurance groups in the Netherlands in terms of gross receipts - Dfl 1,850m in 1977-and we operate internationally in three main areas: life assurance. (Dfl 1,125m-61%); general

insurance, (Dfl 596m-32%); and non-insurance, but related areas, such as mortgages, property development, even holiday centres (Dfl 128m-7%).

At the moment most of our revenue is generated within the Netherlands, a sound and profitable base.

But our overseas business is developing well, and contributed 20% of our total gross receipts in 1977.

We have offices, subsidiaries and affiliates in the United Kingdom, Belgium, the United States,

Balanced growth, internationally.

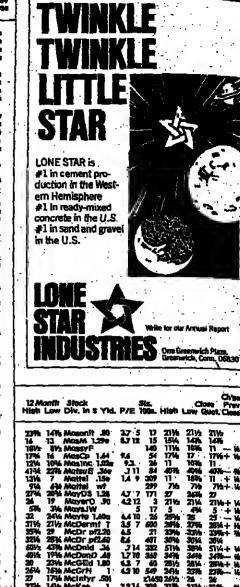

the Caribbean, Republic of Sunnam and the Middle East.

Overall, Ennia have a record of producing sustained balanced growth at home and overseas to the benefit of both shareholders and policyholders.

If you have an interest in the insurance world you should have information about Ennia on file.

We'll be happy to send you a copy of our brochure and the latest Annual Report if you contact our head office: Ennia NV. Churchillplein 1, The Hague, The Netherlands, Tel: (070) 72 72 72. Telex: 31657.

WOMAN OF LETTERS A Life of Virginia Woolf

By Phyllis Rose. Oxford University Press. Illustrated. 266 pp.

Reviewed by Robert Kirsch

TEMINISM was her only true and envy for her sister—but also the notion of the role of women in writing was at its best in the 20s of the areas of special interest to when her feminism was firmest. It altered in the '30s under the onslaught of the very different notions of what constituted politics of tions of what constituted politics of the young men of the left. Losing her feminist perspective, she lost confidence in herself. It was the personal faith which gave her cour-age to write authentically, without warping her talent to suit phantom models of validity."

This personers her no means or

This paragraph by no means exhausts the insight Prof. Rose offers in this strikingly fresh study of Virginia Woolf. Woolf's feminism is the source of replenishment in this literary biography; her madness is not neglected but put into proper perspective. It is easier to cope with a Virginia Woolf who goes mad periodically or fears madness, easier to sum up in illness and suicide, than to see her in the light of a struggle to overcome despair.

The emphasis here is on the interaction between life and writing; the personal myths, as Prof. Rose calls them, that are used to inform the biography. The device enables us to see Woolf as "the most ingratiating and in some ways the most sophis-ticated spokeswoman that feminism has ever had." In novels, essays and reviews, she sheds light on the roles and perceptions of women. Yet, Prof. Rose svoids the trap which many feminist writers fall "ft would be easier for me, and

in some ways more pleasant, to portray her completely as a femin-ist heroine, the victim of social and cultural forces which every woman who sets high standards for herself in a society like ours must face, and to this extent a model for all," she writes. "But the danger exists of overly normalizing a unique and complicated person."

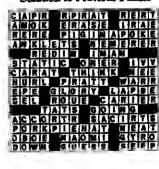

One of the values of this study is that Woolf's uniqueness is never subordinated to theory. To erase the squiggles of her life in order to make it conform to a clear and typical trajectory would be, at the very least, untruthful."

Virginia Woolf's feminism flows from her sense of self and personal experience to her perceptions of types of women in her culture and society. She may have begun with her own hurt feelings, and she had plenty of reasons for these, but ultimately she explored the larger ramifications of being a woman in such a culture. In this regard, Prof. Rose views Woolf's feminism as the crux of her emotional as well as her intellectual life. It is also the key to revising the image of her as an isolated and somewhat precious so much as potentially in ours. Is it her feminism that has kept

alive interest in her? ask those who suggest that she was no more than an elegant minor writer. Prof. Rose says her literary achievement can sustain this surge of scrutiny. But what inspired it and keeps it going "was her feminism, which found in the contemporary spread of feminist consciousness, a receptive andience."

She transcends her Victorian and Edwardian times, taking from her past the materials not only of her own experience — the father who dominated her early life, the ideal-ized charismatic mother lost early, the half-brother whose fumbling sexual assault undoubtedly trauma-tized her, the ambivalence, the love

Solution to Previous Puzzle

me involve the relationship between creative writing and catharis, the effect of social struc-tures on psychology. Prof. Rose is careful to avoid facile speculation. glib connections. She is engaging in her enthusiasm. "I would give a great deal to know what her hallocinations in madness were like," she bursts out. "When the devil appeared to Virginia Woolf, what shape did he take? In addition to her passages in The Voyage Out and Mrs. Dallowsy'. there are glimpses, frustratingly meager. The doctors and nurses were in a conspiracy against her. Her mother was in the bedroom talking to her. The birds sang to her in Greek. King Edward shouted obscenities, naked in the rhododendors."

Medicare is not alamorized here.

Madness is not glamorized here nor is suicide made heroic. It is Woolf's astonishing resiliency, her openness in form, her quest for openness in form, her quest for freedom, her capacity for risk and rebellion (the Dreadnought hoar of 1910 in which she joined her brother and friends, disguised in beard and blackface, turban and caftan, to win a royal welcome aboard a British battleship, is here given as an example of defying and ridiculing an essentially masculine authority), the "enormous psychic price she had to pay for the privi-lege of writing," which is the es-

sence of her accomplishment.
"She was proud of the number of books she managed to write, and well she might have been, for every . , book was wrested from an enemy. within," Prof. Rose says, "the angel in the house she never completely succeeded in killing. Perhaps be-cause the mother she loved so perfeculy embodied the Victorian ideal of womanhood, perhaps because no other ideal of womanhood was available, some part of Woolf, judged herself by the standard she tried consciously to reject. The martyr of stereotypes she was trying to destroy, she nevertheless, succeeded in illuminating the faction. tion — pre-eminently in To the Lighthouse — the tensions and fears that can afflict a creative

We may question some of the conclusions (i.e., that no other ideal of womanhood was available) but we cannot overlook the light which feminism sheds on the shadows of ... Virginia Woolf. Prof. Rose also unwisdom about creative writing that it can release the writer from ther thought and investigation. The transformations wrought by Woolf were not liberating in her own life

Robert Kirsch is book review editor of the Los Angeles Times. O Los Angeles Times

Celtic Tomb Found Intact in West Germany

STUTTGART, West Germany Oct. 9 (AP) - Archaeologists dig-ging into a nearby hillock said they have uncovered funeral chamber of a Celtic prince who ruled southern Germany's Necker region 2,500 years ago.

The wood-lined chamber was found inside what originally must have been a large, monumental earth mound, surrounded by stone wall, with an entrance gate at one end. The chamber contain the remains of the prince's golde-bedecked body and a rich trove of burial gifts, the Baden-Wuertten-berg State Monuments Office said. A spokesman said that the dis-

covery, made near Hochdorf village; in the Ludwigsburg district north of here, is unusual because other graves of early Celtic princes had been looted by grave-robbers by the time they were excavated.

BRIDGE

ft is always tempting to open a hand containing both major suits, but even so South's opening was well below what most players would regard as a minimum. It led him to a normal contract of four spades which would probably have

been reached in any event. South cannot hope to bring home 10 tricks by rufing his losers in the dummy, so he must do some thing about the clubs. With normal play this cannot be done against the actual distribution, but West gave South some help by leading a

South seized the opportunity by winning with the club ace and leading the jack from dummy, being reasonably certain that the club queen was on his right. If East had covered with the queen it would have been an easy matter to ruff and draw trumps ending in dum-

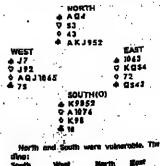

my.

But East, of course, did not cover, and a diamond was thrown from the closed hand. Now came an elegant play. A low club was led from the dummy, and another dia-mond was discarded. East won the

club and could have played a dial mond, giving the defense its last trick. He chose to lead his last dult and South threw the diamond king West's ruff ended the proceeding and declarer had an overtrick. As the analysts will note, the de

By Alan Truscott

gant play was not essential. South would have emerged with the same 11 tricks if he had simply ruffed the third round of clubs for West II. overruff.

can release the writer;

San Diego scored again on its

first possession of the second quar-ter. Woody Lowe recovered a Mor-ton fumble at the Denver 34-yard line and five plays later the Chargers scored on Fouts' pass to Bauer. The Broncos managed just one sustained drive. In the warning moments of the game under the team's third quarterback, Craig Penrose, the Broncos drave to the San Diego 7. But on fourth-andgoal Penrose's pass was batted down at the line of scrimmage and

the Chargers took over.

In the first half Denver failed to convert a single third-down play and managed just four first downs.

Seahawks 29, Vikings 28 At Seattle, Efren Herrera, who had two extra point attempts blocked earlier in the game, kicked a 19-yard field goal as time ran out to give the Seattle Scahawks a 29-28 victory over the Minnesota Vikings

The Seahawks controlled the ball for the final 7:04 of the game, moving 70 yards to the Minnesota 1yard line to set up the winning kick.
Sherman Smith, playing his first
game since an injury in the season
opener, ran for 23 yards and caught wo Jim Zorn passes for 26 yards in

the final drive. Seattle entered the fourth quarter trailing, 28-19. Zorn brought Seattle to within two points with a 22-yard scoring run, his second touch-down of the game, with 9:02 left. The Seattle victory brought the season record for both teams to 3-3.

Rams 27, 49ers 10

At Los Angeles, Pat Haden threw touchdown passes of 11 yards to Willie Miller and 3 yards to John Cappelletti in the first half and the Los Angeles Rams re-mained unbeaten with a 27-10 vic-, tory over the Sau Francisco 49ers. Although Haden fumbled once and had a pass intercepted in the opening period, he helped stake the Rams to a 17-3 halftime lead with

The only 49er first half points came on Ray Wersching's 25-yard field goal at 9:27 of the first quarter after San Francisco failed to put the ball in for a touchdown after it

San Francisco mirned one of four Ram turnovers into a touchdown at 4:14 of the third quarter. Bob Jury recovered Jerry Latin's fumble of the second half kickoff and the

2-yard run.

But the Rams came right back and marched 95 yards in 13 plays for their third touchdown, with

Tony Hill of the Dallas Cowboys (in white jersey) lunges for his fumble against the New York Giants, but the ball was recovered by linebacker Brian Kelley (at right). Dallas won, 24-3.

Gilliam, Dodger Coach, Former Infielder, Dies

coach for the Los Angeles Dodgers and a former star infielder with the team, died here last night after suffering a massive brain hemorrhage

Sept. 15. He went into a coma following surgery shortly after the hemor-rhage and his condition had been critical for much of the time since. Before Gilliam's death, the Los Angeles manager, Tommy Lasorda, said his team was "dedicating the playoffs and the World Series" to

Gilliam, who broke in with the Dodger farm system in 1951 after playing six years in the Negro It was there, at age 17, that Gilliam was tagged with the nickname "Junior" when he went from bat boy to mility infielder. After two years in the minors, Gilliam came up with Brooklyn in 1953 — when he was a Booklyn in 1953 — when he was a Booklyn of the Year here.

environment, could provide some class to make up for Washington's departure. Bob Lanier is the key. The NBA's eighth leading scorer last season at 24.5, Lanier must cope with a coach making his product and a club that lacks confidence."

Detroit's opening lineup proba-bly will have Kevin Porter, who led the NBA in assists last season, at the point guard and Chris Ford at the wing guard and veterans M.L. Carr and John Shumate at forward. Walt Frazier may be at the end of his pro career since Cleveland's coach, Bill Fitch, has not emerged

with a definite plan for the former New York Knick star. "Frazier has given up speed," Fitch says. "In half-court situations, he could make the team. But we don't know his capabilities for a full-court game."

Fitch also is troubled by the failure of Elmore Smith to work his-way into shape during the off-season. The 7-fout center reported with a sore knee.

More Power Needed

Campy Russell and Frazier were Cleveland's leading scorers last season, but more firepower is needed. Smith, Jim Chones and Austin Carr bit for 12.5, 15.0 and 12.3, respec-

The drafting of Kentucky's Jack Given and Marquette's Butch Lee, plus free agent Dan Roundfield from Indiana could make Atlanta a contender. Veteran Geoff Petrie, a former All-NBA guard, could be valuable in a comeback.

High-scoring John Drew (23.2) provides coach Hubie Brown with a good, small forward but some ralented height is needed around the key. Tree Rollins, a 7-1 center. averaged only 7.6 points.

New Orleans star Pete Maravich

expects to be in top shape after knee surgery and coach Eigin Bay-lor is further delighted that forward Truck Robinson finally stopped complaining and said he was ready to play basketball. The Jazz finished next to last in

the Central Division. Robinson was New Orleans leading scorer with a 22.7 average and the league's leading rebounder on a 15.7 average. New Orleans needs another double-figure effort from veteran guard Gail Goodrich and good board work from Joe Meriweather and 7-foot Rich Kelley to control the direction of the game.

Lemon, After Martin

Yankees' Quiet Man Is Paying the Price

NEW YORK, Oct. 9 (NYT) -The quiet man who took charge of the New York Yankees 11 weeks ago when they were in fourth place sits in the manager's office in Yan-kee Stadium — surrounded by suc-cess and by the echoes of Billy

No two people could be more different in temperament than Martin and his low-keyed succes-sor, Robert Granville Lemon. No one baseball team could be so different in October from what it was in July.

But Bob Lemon, the 22d mana-ger of the most successful team in the business, shies away from all comparisons because his job is still not finished.

"Some people keep it inside," he says, almost in a whisper. "Other people let it come out. You can't

change what you are."
But, he is asked, what happens after you keep it inside long enough? He reaches across the desk past an autographed picture of Yogi Berra, another of his prede-cessors, and picks up a large box of "wafers" for nervous stomachs.
"This is what happens," he

Lemon is flanked by plenty of reminders of Martin's tumultuous reign, which presumably will be re-sumed in 1980 after the strangest interregnum in baseball history. That's when the quiet man is sched-

uled to go upstairs as general man-ager and the loud man is supposed to reappear downstairs as manager.
Meanwhile, the Yankees have undergone a spectacular change since July 24, when Martin re-signed under fire and Lemon took command. The team, then 10 ½ gmes behind the Boston Red Sox, went roaring through August and September and into October playing better than .700 ball in pursuit of a third straight pennant. The team won the pennant last weekend over the Kansas City Royals, three games to one, and will meet the Los Angeles Dodgers in the World Se-

ries starting tomorrow night.

The Yankees' behavior during Lemon's reign was even more of a contrast than their performance: They abruptly stopped feuding and started winning. Could one quiet man cause such a transformation?

"I'm not a mental giant," the man says, finessing the question, lest be trample on the ghost of Billy Martin. "Tim not smart enough to know whether I'm what you call 'a calming influence." What do I do that's right? I stay out of their way, that's what I do. These gnys know how to play, so I let them alone. I always felt players should be left alone to rise to their own level.

Not a Meddler

that's the way I liked it. And that's with: "It was your lucky day when the way I got it from my managers,
Lou Boudreau and Al Lopez. I'm
Lemon, still in low k

oot a meddler.
"But, look, the Yankees were starting to get bealthy when I took over. They'd been playing with injuries. Mickey Rivers was out, Bucky Dent was out, Willie Ran-dolph was out and Catfish Hunter

Lemon stares straight ahead through rimless cycglasses that make him look like a 58-year-old

school teacher, and adds:

"I know one thing: If the Red
Sox didn't go through what they
did in the second half of the season, we could've played our backs off

and still come in second. Then we'd be home right now, home for the winter. No, I'm oot so calm. It's been a crazy year for me, and I'm just enjoying it."

It's actually been a crazy two years for Lemon, a curly-haired Californian who made the Hall of Fame after pitching a no-hitter and 206 other victories. Last season, he steered the Chicago White Sox from last place to third in the American League's West and was voted manager of the year. Then on June 29 this season, only 5 ½ games out of first place, he was fired by his longtime friend, Bill Veeck, the owner of the White Sox. One month later, he was running the de-fending world champions of base-

Going Hollywood

"I was hired by the Yankees between pictures, as they say in Hollywood," be recalls. "But I don't blame Bill Veeck for letting me go. It happened in Minnesota during a trip — the first trip he'd taken with the team, so I knew something was up. The team played badly in Seattle, then we went to Minnesota and he telephoned me to the hotel and celled true to his in the botel and called me to his

room.
"He just said: 'We've got to make a change.' It was hard personally for him to do it. So I said: 'It's your club.'

"Now I'm very grateful that it happened. A month later, Al Rosen telephoned me and asked: 'How'd you like to manage the Yankees?' I said yes. He said he had to go to Kansas City and join the term

Kansas City and join the team. So I thought maybe he'd get things ironed out with Billy Martin. But the next day be called back and said: 'Come on.'

Been There Before

"What was in my mind's eye?
Well, I'd been the pitching coach of
the Yankees in 1976, and I'd
watched them win the World Series in 1977 on television. So I knew they were the same guys. It's true, in June you felt Boston had the league locked up. But nobody can keep up that pace."

George Steinbrenner, the owner of the Yankees and the chief keeper of Billy Martin, bounds into the manager's office and save:

manager's office and says:
"When I was a sophomore at

Culver Military Academy in 1946, Bob Lemon was pitching for the Cleveland Indians and he was my hero. The day I read that he was fired by the White Sox, I said to myself: 'Bill Veeck, you made a big "He lets it all come out of the

players," Steinbrenner says, rapturously. "Even Billy Martin would be the first to admit it. This guy's done a fantastic job." He turns to I

Lemon, still in low key, replies: "I bope you'll love me in December as you do now."

Rosen, once the third baseman and home-run hitter for the Indians in the days when Lemoo was pitch-ing 20 victories a year, bounds into the office, too. Now he is president of the Yankees, the man who summoned Lemoo back from his fishing and golf and family this summer, the man who made him the designated manager of the Yank-

"How's your stomach?" he asks, sounding unconcerned.
"Terrible," replies the quiet man of the Yankees, getting no sympathy from either of his employers.

United States defeated Canada, 96-90, today to keep its hopes alive for a final slot in the world basketball championships by picking up its second victory in four games in the

closing minutes to hold off the determined Canadians.

In other games. Brazil defeated the Philippines, 119-72, and tied Yugoslavia for the lead in the semi-finals with four victories and no defeats. Yugoslavia, a strong contender

Amateur Doctors Have a Cold Day

WASHINGTON — Because W medical costs are rising so fast, more and more people are diagnosing their own illnesses or, worse still, those of their friends. make a study of how these nonprofessional diagnoses are affecting
the nation's health picture.

The other day 1

The other day 1

The diagnoses are affecting the nation's health picture.

The other day 1

had a cold. It was just like the ones you see on television. I was sneezing, coughing and looking mourn-fully at my wife. I called my secre-tary at the office and said I

1 wouldn't be in be-Buchwald You must have one of those 'eight-hour things' that's going all around town, she said. "You'll feel perfectly well tomorrow,"

Eight hours seemed to be a rea-sonable time to have a cold, and 1 was looking forward to staying in bed, particularly since the Yankees and Red Sox were playing a crucial game to get into the American League playoffs. * * *

My sister called, and I told her I had one of those "eight-hour things that's been going all around." "Are you sure it's only an 'eight-hour thing?" she asked. "It could be the '24-hour bug. Harold had it last week. Do you have any fever?"

"A little — maybe 100."
"That's the '24-hour hug' for sure. Drink loss of fluids and take aspirin, and you'll be able to shake it off."

I really hadn't counted on staying in bed for 24 hours, but it's stu-pid to fight a hug. My other sister called up 10 minutes later, "Edith says you've got a '24-hour bug.'

l don't know if it's a bug or just "Is your nose red from blowing

Mexico Mammoth

MEXICO CITY, Oct 9 (UPI) --Archeological excavators digging up the Aztec Grand Temple near here have uncovered the remains of a prehistoric mammoth, anthropologists announced.

"Yah, sure it is. Why do you ask?"

"Then you don't have a '24-hour bug. You have a '48-hour virus.'
"My socretary said all I bad was

it. The '24-hour bug' bas all the symptoms of the 'eight-hour' one. except that you cough a lot. The 48-bour virus makes you sneeze, cough and perspire while you're sleeping. You have to stay in bed for two days."

"But I can't stay in bed for two "Look," my sister said. "If you don't want medical advice, don't

ask me. I think I might have been all right except that my secretary told Healy I was home with the flu.

He called, of course, "I feel for you," he said, "You won't be able to shake it for two weeks. If it were a winter cold I'd say you'd be better in five, maybe six days. But you have an October cold, It's almost impossible to get rid of. You hear my voice? It's been like this since August."

"But suppose my cold goes away in 24 hours?"

"That's when it can become the most dangerous. You think it's gone away and then a week later you wake up and it's back with a vengeance. I'd rather have a twoweek bout with a chest cold than a '24-hour bug' which sneaks up on you like a thief in the night." Word travels fast in Washington,

and Elfin of Newsweek was terse and to the point. "Healy tells me you have an incurable form of pneumonia.

'Either that," I said, "or an 'eight-bour thing' or a '24-hour hug' or a '48-hour virus' or a two-week bout with the flu or a simple cold. I'm waiting on another opinion right oow,

From whom?" "My druggist, He says there's a

lot of it going around."
"What's going around?"
"You name it, and he says he's
never seen so much of it going

The Luck of Leakey

By Paul Hendrickson

WASHINGTON (WP) - He has a W briefcase and a pipe and a tweedy coat. That seems all wrong, Richard Leakey senses the disappointment. People are foreyer trying to make a romance of this work, he sbrugs. They want khaki shorts and a Land

Rover. "I should like to disabuse that."

Actually, Richard Leakey, whose work is puzzling out the secrets of man's origins. does pretty well in spite of himself in mak-ing it all sound romantic. Ask, for instance, for a verbal picture of his fossil-hunting camp at Koobi Fora, on the banks of Lake Turkana in northern Kenya, and he will paint a fierce Impressionist canvas of yet-low-green spiking grass and languid croco-diles and mountains baking under a brittle blue sky. At night the wind comes up, and it

"The camp is on a spit and so the lake is he fore and behind the camp." he says with a pleasant-sounding colonial British accent.
"The camp faces north so that one in fact gets the passage of the sun continually changing colors on the water. You can stand out there and in half an hour the lake will go from blue to green to brown to what is near-

ly a pewter gray."

Leakey is 33. He is heir to the most famous genes in modern anthropology. Quick and polite, he conducts himself in that sure, almost sporty British way, tucking a paren-thesis here, inserting a phrase like "the quote, women's lib, unquote, movement" there, begging off any claim to authority, yet by virtue of his name and intellect and pol-

Richard Leakey and friend.

He's in the United States (he averages a couple of hops a year) to hold meetings on the museum he heads and to chat about his new book, "People of the Lake," written in conjunction with Roger Lewin, science editor of the New Scientist magazine in London

He's anxious to get back to Kenya.

"Semantic"

Can we pinpoint the specific time man became man? "Somewhat of a semantic discussion, don't you think? I don't know anyone who's

really certain when mankind became man-kind — or even what it is. Certainly we

kind — or even what it is. Certainly we know what we are — Homo sapiens."

Was the Garden of Eden in East Africa?

"I don't think there was one, do you? You do? Well, if you wish a Garden of Eden, you have to put it in Africa. But I do think it was a big garden. A big garden."

This isn't to suggest Leakey is not a serious, even intense, human being. In the past 10 years, on a combination of drive and what he calls dumb luck, be has moved him-self to the forefrom of modern cultural anthropology, making dramatic fossil discoveries, writing books, postulating new and unpopular theories (a chief one being that Homo sapiens doesn't necessarily have ag-gression in his bonest, threatening, some say, to eclipse even the sacrosanct reputation of two people who raised him.

His father, Dr. Louis B. Leakey, pioneer in research of Homo habilis (handy man), an important link with that other bominid, Homo erectus, died in 1972. But Mary Leakey. Louis Leakey's tough, cigar-smoking widow, is still known to put in a full day on the sites, one of which is the Olduvai Gorge on the Serengeti Plain in Tanzania, where she and ber busband were digging for fossils as much as 40 years ago. Mother and son don't mix in their professional lives: never have. There was a time when father and son barely spoke.

'Eclipsing Business'

"If one wants to put it simply in those terms, it may have happenend in some areas already, this eclipsing business," Leakey says cautiously. "But the work is different,

On one hand, it might seem the natural, happy way of things for a son following in his father's footsteps to eventually overtake him. Even if the father was the powerful, crotchery, charismatic Louis Leakey. In this case, the son happens to be unschooled in the profession, lacking any formal higher

studies whatever. Richard Leakey left the Nairobi public ". . . I must take exception." schools at 17 to set up a safari husiness

(highly successful). About the only thing he was sure of back then was that he wouldn't follow in his father's footsteps. "One felt a little intimidated," he says. From the time be was 6 months old, he and his brothers. Philip and Jonathon, were being carted around on expeditions.

"I just wanted to get out — go away and look at animals. But it passed. The time He sounds matured now in his attitude

toward his parents. "In my own mind, nothing I do will ever cast a shadow on my father's accomplishments," he says.
"You know, my parents worked at Olduvai Gorge from 1931 to 1959 without making an important discovery. I found fossils a couple of years out. A lot of it is just luck."

Degree of Pride

Leakey seems inversely proud not to have academic initials tacked after his name. He likes saying that he's learned it all on the job, that he's "not an "ist" of anything."

What is surprising about Richard Leakey is that he's colly a rest, time authorpolarist.

is that he's only a part-time anthropologist. His real job is directing the National Museum of Kenya, a post he's held since 1968. This means be lives most of the time in Nairobi and goes to work as a hureacrat. Three bundred people work for him, be says. "Lots of brunches and that sort of thing."

Leakey is married to an anthropologist. Meave Leakey did her Ph.D. in Wales. They have three daughters.

Leakey is not a man of religion, though his grandparents on his father's side went to Kenya as missionaries and though a few un-cles are Episcopal clergymen. Contemplat-ing ancestors who lived three to five million years ago and fragments of bone hasn't

made him believe in an afterlife, he says.
"What happens after death? I don't think anything need happen." Agnosticism or atheism aside, there is a moral current running in Leakey. Altruism, he calls it. One of the conclusions of "People of the Lake" is that war "is not a hiological inevitability" and that the more one studies prehistory the more he can be convinced that early man led a life based on sharing and order and thoughtful adaptation. "In its

dom, bumanity invented a new game, and that game is called culture," he writes. The view of altruistic man runs counter to the more voguish view espoused by men like Robert Ardrey ("The Territorial Impera-uve") and Konrad Lorenz ("On Agression") who feel the tie that binds is hostility. Greed and murder are just in the genes.

gradual emergence from the animal king-

which masses of people can be led to beliefs." Leakey says. "The way this aggres-sion idea has been portrayed the last 10 years is astounding. I mean, you talk with cah drivers or policemen or Sunday school teachers and they'll tell you this is just the way it is. I must take exception."

"I've become appalled at the ease in

Leontyne Price scored a hit with President Carter in her second appearance at the White House. An anti-inflation aria next?

Opera's Leontyne Price: PEOPLE: Opera & Leoney ...

ton. The Metropolitan Opera star's return engagement underscored something she has always emphasized, the president noted. "We are trying to... convince the American people that opera is not just a luming for a few but is a thing of luxury for a few, but is a thing of beauty to be enjoyed by everyone." Her first performance at the White House was in 1965 for the late Aldo Moro, then president of the Coun-cil of Ministers of the Republic of Italy; she received a Presidential Medal of Freedom. Price's latest performance won raves, especially from Charles Schultze, chairman of the Council of Economic Advisers. But Schultze wasn't so directly ex-pressive when it came to talking about the the contents president's forthcoming anti-inflation message. "We'll put it to music," be quipped, his choice being Berlioz "Sympho-nie Fantastique." President Carter had his own thoughts on how that message might be composed and performed. "How about Willy Nelson to compose it," be mused, "and Miss Price to sing it?"

In Warsaw, U.S. evangelist Billy Graham drew an estimated 2,000 people to his first service in communist Poland, filling the Warsaw Baptist Church to overflowing. Several dozen people in the crowd gathered from other churches in Warsaw and from elsewhere in Eastern Europe raised their hands

agrice, improbed has been considered in Athens. So now you a sove Greece in the beautiful classic derelean style you'll love getting accorded to. Call Lambis Carnavas, o ew man in Athens, He'll show you the saving Greece doesn't have to be said occurrien.

INTERDEAN

ATHENS

They had a lot in common, both from small towns, both ambitious. But Leontyne Price "made it to the White House 11 years before I did," Jimmy Carter said at the third in a series of Sunday afternoon White House concerts in Washington. The Metropolitan Opera star's convice. Afterwards, assistants disservice. Afterwards, assistants distributed copies of the Gospel of St. John in Polish. There was no publicity on Graham's visit in the statecontrolled news media.

> Lorenzo Amata, of Glen Falls, N.Y. has observed the first anniversary of his baking the world's bigsary of his baking the world's oligest pizza by breaking his own record. On Columbus Day 1977. Amato baked a 40-foot pizza. Nearly a year later, he topped that feat in Wilton, N.Y. — braving the property of rain, snow and a little hail - by whipping up a pie slightly more than 80 feet in diameter and an incb thick Amata's recipe called for just the basics: five tons of flour, 664 gallons of water, 316 gallons of pizza sauce and 1,320 pounds of cheese, sprinkled with 1,200 pounds of pepperoni. Amato sold almost 4,000 slices of the 5,027 square-foot object. The proceeds about \$5,000 — were donated to the Muscular Dystrophy Associa-non. Aided by 100 helpers. Amata baked the snack on top of 200 4-by-8-inch carbon-steel plates welded together. They were supported by 231 concrete blocks and heated by 40 propane burners. The kitchen was a 25-acre field. Leftovers were donated to a nearyby school's bot -SAMUEL JUSTICE.
